Control testing, calibration of measuring equipment system and automatic control system, transmission system up to 500KV;

Supplying, installing and maintaining of types of elevator and fire protection system;

Other non- electrical system installation, plumping, heating and air-conditioning system installation, installation industrial machinery in the construction industry and construction of civil engineering projects; Supplying types of elevator and fire protection system;

Wholesale of electric equipment, electric materials, mining machinery, construction machinery, machinery for textile, leather production and office machinery;

Installing of electricity system, water system, ventilation equipment, air conditioning;

Installing of equipment of automation technology, environmental technology, water treatment, control system, measuring equipment and lightning protection equipment for power systems;

Designing production lines, construction materials, paper and food processing;

Manufacturing metal accessories, metal structures, non- standard construction accessories, manufacturing construction materials, flooring tile, roofing panel, paving stone, calcium carbide, oxygen, welding electrode, materials and equipment business, construction material;

Construction of industrial works, electricity transmission lines, transformer station, assembling equipment and machinery for works;

Import and export the Company's trading items;

Construction of buildings;

Construction of roads and railways; Construction of utility projects;

Demolition; Site preparation;

Electrical installation activities;

Building completion and finishing;

Other specialized construction activities;

Wholesale of electronic and telecommunications equipment and supplies;

Wholesale of electric lighting equipment, afr- conditioning;

Repair of machinery;

The Company only performs conditional business lines when satisfying qualified capacities in accordance with regulations of prevailing law.

No. 434 - 436 Nguyen Trai Street - Nam Tu Liem District - Ha Noi City

Circular No.200/2014/TT-BTC

1. Accounting period and accounting currency

The Company's annual accounting period begins on January 01 and ends on December 31 each year.

•The financial statements are measured and presented in Vietnamese Dong (VND).

III. ACCOUNTING STANDARDS AND SYSTEM

1. Applied accounting system

The company applies the Vietnamese accounting system under circular NO.200/2014/TT-BTC dated December 22nd,2014 of the Ministry of Finance guiding the enterprise accounting regime and other amended and supplemented legal documents according to the State's regulations.

Declaration on compliance with accounting standards accounting system

The Company applies the Vietnam Accounting Standards and the Standards guidelines issued by the State. The financial statements are prepared and presented in accordance with all provisions of each standard, circular guiding the implementation of standards and prevailing applicable accounting system.

IV. ACCOUNTING POLICIES

1. Accounting estimates

The preparation of financial statements in accordance with Vietnamese accounting standards, regulations on accounting for enterprises and other regulations related to the preparation and the presentation of financial statements requires the Board of Directors to have estimates and assumptions affect the reported data on assets and liabilities and the presentation of contingent assets at the date of the financial statements, as well as the reported date on revenues and expenditures, fees during the operation period. Although accounting estimates are prepared by the management's knowledge, the actual numbers arising may differ from the estimates or assumptions set.

Principles of accounting for cash and cash equivalents

Transactions in foreign currencies are converted into VND at the actual exchange rate on the date of the transaction. At the balance sheet date, the monetary items denominated in foreign currencies are converted into VND at the actual buying rate reported by the commercial bank where the Company opens its business account on the balance sheet date. Cash equivalents are highly liquid investments (not exceeding 3 months), which can be easily converted into known amounts of cash and that are subjected to an insignificant risk of changes in value at balance sheet date.

3. Principles of accounting for financial investments

Held to maturity investments

Held to maturity investments include investments that the Company has the intention and ability to hold to maturity. Held to maturity investments are term deposits in bank. .

Held to maturity investments are recognized starting from the acquisition date and are initially valued at purchase price and related expenses. Interest income from held to maturity investments after the acquisition date is recognized in the income statement on accrual basis. Interest earned before the Company holds is deducted from the original cost at the time of purchase. Held to maturity investment are stated at cost less provision for doubtful debts.

Provision for doubtful debts for held to maturity investments is made up in accordance with current accounting regulations.

No. 434 - 436 Nguyen Trai Street - Nam Tu Liem District - Ha Noi City

Circular No.200/2014/TT-BTC

Principles of accounting for receivables

Receivables represent the amounts recoverable from customers or other debtors and are stated at book value less provision for doubtful debts.

Provision for doubtful debts is made for receivables that are overdue, or when the debtor is in dissolution, in bankruptcy, or is experiencing similar difficulties and so may be unable to repay the debts.

Principles of accounting for inventories

Inventories are valued according to their original prices. Where the net realizable value is lower than the original price, they must be valued according to the net realizable value. The original price of inventories consists of the purchasing cost, processing cost and other directly-related costs incurred for having the inventories stored in the present place and conditions.

The original prices of inventories shall be calculated according to the quarterly weighted average method. Their net realisable value represents the estimated selling price less all estimated costs of completion and costs to be incurred in marketing, selling and distribution.

The perpetual method is used to record inventories.

Principles of accounting for fixed assets and their depreciation

Principles of accounting for tangible and intangible fixed assets

Tangible and intangible fixed assets are valued according to their original prices. During the using time, fixed assets are recorded at cost, accumulated depreciation (amortization) and net carrying amount.

Depreciation is calculated based on the straight-line basis. Depreciable period is appropriately estimated based on the depreciable period regulated in Circular No. 45/2013.TT-BTC dated April 25th, 2013 of the Ministry of

Finance.

Asset types	Years
House, buildings	10-20
Machinery and equipment	5-10
Motor vehicles	6-10
Management tools	3-6

The land use right is indefinite term, hence it is not depreciated

7. Principles of accounting for prepayments

Prepayments are expenses which have already been paid but relate to results of operations of multiple accounting periods. The prepayments of the Company comprise costs of valuable tools and supplies issued for consumption, and other prepaid expenses which are expected to to provide future economic benefits to the Company. These expenditures have been capitalized as prepayments, and are allocated to the income statement using the straight-line method in accordance with the prevailing accounting regulations.

Principles of accounting for payables

The classification of payables into trade payables, and other payables are made on the following principles: Trade payables consist of commercial payables arising from transactions of trading goods, services, and assets.

Payables consist of expenses arising from the practice of importing through entrustment. Other payables are remaining payables that are not classified as trade payables, intercompany payables.

Payables are separately recorded for each creditor, according to the payment content, payment schedule, and type of currency.

Payables are classified as short-term debts when the remaining maturities of the payables are less than 12 months (shorter than the duration of a business cycle) at the time the financial statements are prepared. Other payables not classified as short-term debts are classified as long-term debts. When preparing the financial statements, payables are reclassified under this principle.

The Company will record a payable immediately when there is evidence that a loss is inevitable, in accordance with the precautionary principle.

Payables are not recorded at lower values to payment obligations.

Provision for payables are made at the time the financial statements are prepared in accordance with prevailing regulations.

Principle of recognition of Ioans and financial lease payables

Loan value is recorded upon each disbursement and repayment period. Value of financial lease liability is the total

No. 434 - 436 Nguyen Trai Street - Nam Tu Liem District - Ha Noi City

amount payable calculated by the present value of the minimum lease payments or the fair value of the leased assets outstanding at the time of financial statement preparation.

Loans and financial lease liabilities are recorded in detail and monitored for each lender, each loan agreement, each type of debt, loan term and currency of debt.

When preparing the financial statements, the balance of loans and financial leases in foreign currencies is revalued at the selling exchange rate of the bank where the Company has loan and finance lease transactions.

10. Principle of recognition and capitalization of borrowing costs

Borrowing costs are recognized into production and business costs in the year when incurred, unless capitalized in accordance with the Accounting Standard "Borrowing costs". Accordingly, borrowing costs directly related to the purchase, investment in construction or production of assets that take a relatively long time to be completed and put into use or business, are added to the originial cost of the assets until the property is put into use or trade. Income arising from temporary investment of loans is recorded at a decrease in cost of related assets. For separate loans for the construction of fixed assets, investment properties, interest is capitalized even if the construction period is less than 12 months. The borrowing cost capitalization ratio for the period is 0%.

11. Principles of accounting for accrued expenses

Accrued expenses reflect amounts payable for goods or services received from the seller or provided to the buyer but not yet be incurred due to lack of invoices or incomplete accounting records and documents. These expenses are accrued as operating cost in the accounting period in order to ensure no dramatic fluctuation in the operating cost as requied by revenue and expense matching principle. When these costs are incurred, if there are any discrepancies with the accrued amount, accounting will make additional accrual or record cost deduction at the value of the difference.

12. Principle and method of recognition of provisions payables

The recognized value of a provision is the most reasonable estimate of the amount that will be payable to the current liability at the financial statement date.

Only expenses related to an initial established provision is covered by that provision. The difference between the unused provision made in the previous accounting period and the provision payable in the reporting period is reversed as a decrease in production and business costs in the period minus the larger difference of the provision payable to the construction work warranty, which is reversed into other income during the period.

13. 14. Principles of accounting for owner's equity

Principle of recognition of owner's contributed capital, equity surplus and other capital owners

Equity of the owners is recorded according to the actual contributed capital of the owner

Share premium is recognized according to the greater and lesser difference between the actual issue price and the par value of the shares upon the initial issue, additional issuance or re-issuance of treasury shares.

Other equity of the owner is recorded according to the residual value between the fair value of assets donated or donated by other organizations or individuals after deducting (-) payable taxes (if any) in relation to these donated assets and additional business performance.

Principle of undistributed profit recognition

Undistributed after-tax profit is the amount of profit from the enterprise's activities after subtracting (-) adjustments due to the retrospective application of changes in accounting policies and the retrospective adjustment of material misstatement of last year. Profits are distributed to the owners according to the annual resolutions of the shareholders' meeting.

14. 15. Principle of revenue recognition

Revenue from providing services

The revenue from providing services is recognized when the outcome of that transaction can be reliably determined. In case the provision of services involves several periods, revenue is recognized in the period according to the result of the completed on the day Balance sheet made in that period. The result of providing services is determined when the following conditions are satisfied:

The revenue can be measured reliably;

It is possible to obtain economic benefits from the transaction of providing that service;

Indentifying the completed work on the balance sheet date; and

Indentifying the costs incurred for the transaction and the cost to complete the transaction of providing that service.

Circular No.200/2014/TT-BTC

Revenue from construction contracts

Where the outcome of a construction contract is estimated reliably and accepted by customers, revenue and costs are recognized by reference to the stage of completion of the contract activity in the period that is 1 accepted by customers and stated in the relevant invoices.

Revenue from financial activities

The revenue arising from bank deposit interests, dividends paid and from foreign currency differences, recognized on the basis of the bank's monthly deposit interest notice, noticing payment of dividends and interests due to changes in exchange rates of transactions related to foreign currencies.

15. Principles of accounting for cost of goods sold

When revenue is recognized, the corresponding cost related to the creation of such revenue must be recognized. Costs corresponding to revenues include costs of the period in which revenues are created and costs of the previous periods or payable costs related to the revenues of such period.

16. Principles of financial expense recognition

The expenses recorded in the financial expenses include: Loans and borrowing costs and losses due to the changes of exchange rate of foreign currency related transactions.

The above items are recorded according to the total arising in the period, not offset with financial income.

17. Principles of enterprise management cost accounting

Administration expenses reflect all general expenses of the company such as: salary and insurance of the company's managers, depreciation of fixed assets used for corporate management, land rental, license tax, provision for bad debts, services purchased from outside to serve the management of the Company.

18. Principles and method of recording current corporate tax expense

Current corporate income tax expense is calculated based on taxable income and income tax rate of current year. The determination of the Company's income tax is based on the current tax regulation. However, these regulations change from time to time and the final determination of corporate income tax depends on the results of the tax authorities' tests.

Other taxes are paid in accordance with the prevailing tax laws in Vietnam.

19. Related parties

Parties are considered to be related if they have direct or indirect relation to control the other party or exercise significant influence over the other party in making financial and operating decisions. Transactions with related parties are presented at Notes to the Financial Statements.
