Accordingly, the Company has also prepared its Financial Statements for the accounting period ended June 30, 2025

2.2. Accounting period, accounting currency

The Company's annual accounting period begins on January 01 and ends on December 31 of each year.

The accounting currency is Vietnamese dong (VND)

2.3. Applicable accounting standards and system

Applicable accounting system

The Company applies the Corporate Accounting System issued under Circular No. 200/2014/TT-BTC dated December 22, 2014 of the Ministry of Finance and Circular No. 53/2016/TT-BTC dated March 21, 2016 of the Ministry of Finance amending and supplementing a number of articles of Circular No. 200/2014/TT-BTC.

Declaration on compliance with Accounting Standards and Accounting System

The Company has applied Vietnamese Accounting Standards and guiding documents issued by the State. The Financial Statements are prepared and presented in accordance with all provisions of each standard, circular guiding the implementation of the applicable Accounting Standards and Corporate Accounting System.

2.4. Financial instruments

Initial recognition

Financial assets

The Company's financial assets include cash and cash equivalents, trade and other receivables, loans, short-term and long-term investments. At the date of initial recognition, financial assets are stated at purchase price/ cost plus other costs directly attributable to the purchase and issuance of such financial assets.

Financial liabilities

The Company's financial liabilities include loans, trade and other payables, and accrued expenses. At the date of initial recognition, financial liabilities are stated at cost plus other costs directly attributable to the issuance of such financial liabilities.

Subsequent measurement

Currently, no regulations on revaluation of financial instruments upon initial recognition are issued.

2.5. Cash and cash equivalents

Cash includes cash on hand, demand deposits, monetary gold used for value storage functions, excluding gold classified as inventories used as raw materials for the production of products or goods for sale.

Cash equivalents are short-term highly liquid investments with a maturity of no more than 03 months that are easily convertible into known amounts of cash and which are subject to insignificant risk of conversion into cash.

2.6. Financial investments

Investments held to maturity include: Term deposits (including treasury bills, promissory notes), bonds, preferred shares that the issuer is required to redeem at a certain time in the future, loans, etc. held to maturity to earn periodic interest and other investments held to maturity.

Investments in subsidiaries, joint ventures and associates are initially recognized at cost. Upon initial recognition, such investments are stated at cost less the provision for impairment of investments.

Dividends received in shares are only recognised for the number of shares as received, not for the increase in the value of the investment and financial income.

The value of the exchangeable shares is stated at fair value on the exchange date. The fair value of listed shares is the closing price listed on the stock market. For unlisted shares traded on UPCOM, it is the closing price on UPCOM. For other unlisted shares, it is the price agreed upon in the contract or the carrying amount at the date of exchange.

Provisions for impairment of investments are made at the balance sheet date as follows:

- For investment in trading securities: Provision is made on the basis of the difference between the cost of the investments included in the accounting books and their market value at the date of provision.
- For investments in subsidiaries, joint ventures and associates: Provision for impairment of investments is made when the investee incurs a loss, based on the Financial Statements of the subsidiaries, joint ventures and associates at the date of provision.
- For long-term investments (not classified as trading securities) and without significant influence on the investee: if the investment is made in listed shares or the fair value of the investment is reliably measured, provision is made on the basis of the market value of the shares; if the fair value of the investment cannot be determined at the reporting date, provision is made pursuant to the investee's Financial Statement at the date of provision.
- For investments held to maturity: based on their recoverability, provision for doubtful debts is made in accordance with the provisions of law.

2.7. Receivables

Receivables are monitored by due date, receivable subject, original currency, and other factors according to the Company's management needs.

Provision for doubtful debts is made for the following items: overdue receivables stated in economic contracts, loan agreements, contractual commitments or debt commitments and receivables that are not due but are not recoverable. In particular, the provision for overdue receivables is based on the principal repayment period according to the original sales contract, not taking into account extensions between the parties and receivables that are not due but whose debtor has gone bankrupt or is being dissolved, missing or absconding.

2.8. Fixed assets

Tangible fixed assets and intangible fixed assets are initially stated at cost. In the course of use, tangible fixed assets and intangible fixed assets are stated at cost, accumulated depreciation and residual value.

Depreciation is calculated using the straight-line method. The estimated depreciation period is as follows:

- Machinery and equipment	04 - 05 years
---------------------------	---------------

2.9. Construction in progress

Construction in progress includes fixed assets that are being purchased and constructed but have not been completed at the balance sheet date and are stated at cost. Cost includes costs for construction, installation of machinery and equipment and other direct costs. Construction in progress is only depreciated when such assets are completed and put into use.

2.10. Prepaid expenses

Expenses related to the business performance of many accounting periods are recognised as prepaid expenses to be gradually allocated to the business performance in the following accounting periods.

The calculation and allocation of long-term prepaid expenses into business and production costs for each accounting period is based on the nature and level of each expense to select a reasonable allocation method and criteria. Prepaid expenses are gradually allocated to business and production costs using the straight-line method.

2.11. Liabilities

Liabilities are monitored by term, payable entity, original currency and other factors according to the Company's management needs.

2.12. Equity

Equity is stated at the actual amount of paid-in capital.

The share capital surplus reflects the difference between the par value, direct costs related to the issuance of shares and the issuance price of shares (including re-issuance of treasury shares) and can be a positive surplus (if the issuance price is higher than the par value and direct costs related to the issuance of shares) or a negative surplus (if the issuance price is lower than the par value and direct costs related to the issuance of shares).

Undistributed profit after tax reflects business performance (profit, loss) after corporate income tax and the distribution of profit or loss by the Company. Where any dividend or profit is paid to the owner in excess of the undistributed profit after tax, it is stated as a decrease in paid-in capital. Undistributed profit after tax can be distributed to investors based on their ratio of capital contribution with the approval of the General Meeting of Shareholders/Board of Directors and after funds have been set aside in accordance with the Company's Charter and the laws of Vietnam.

Dividends payable to shareholders are recognised as payables on the Company's Balance Sheet after the Company's Board of Directors announces the dividend payment and the Vietnam Securities Depository Center announces the dividend payment date.

2.13. Revenue

Sales

Sales are recognized when all of the following conditions are met:

- The significant risks and rewards of ownership of the goods have been transferred to the buyer;
- The Company no longer retains control over the goods;
- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Company;
- The costs incurred or to be incurred in respect of the transaction can be measured reliably.

Revenue from supply of services

Revenue from supply of services is recognized when all of the following conditions are met:

- The amount of revenue can be measured reliably;
- It is probable that the economic benefits associated with the transaction will flow to the Company;
- The percentage of completion at the balance sheet date can be measured reliably;
- The costs incurred for the transaction and the costs to complete the supply of services can be measured reliably.

The portion of the service as completed is determined using the percentage of completion method.

Financial income

Revenue from interest, royalties, dividends, profits and other financial income is recognized when both (2) of the following conditions are satisfied:

- It is probable that economic benefits from the transaction will flow to the Company;
- The amount of revenue can be measured reliably.

2.14. Cost of goods sold

The cost of goods sold during the year is recognised at the amount of revenue generated during the year and ensures compliance with the principle of prudence. Excessive material loss, excessive costs, lost

inventories after deducting the responsibility of the relevant collective or individual, etc. are fully and promptly included in the cost of goods sold during the year.

2.15. Financial expenses

Expenses included in financial expenses comprise:

- Expenses or losses related to financing and investment activities;
- Borrowing costs;
- Losses from liquidation, transfer of short-term securities, costs for sale of securities;
- Provision for impairment of trading securities, provision for investment losses in other entities, losses from sale of foreign currencies, foreign exchange losses, etc.

The above amounts are stated at the total amount as incurred during the year, without offsetting against financial income.

2.16. Corporate income tax

a. Deferred tax assets and deferred tax liabilities

Deferred tax assets are determined based on the total of deductible temporary differences and the carry-forward of unused tax losses and unused tax credits. Deferred tax liabilities are determined based on taxable temporary differences.

Deferred tax assets and deferred tax liabilities are determined using the current corporate income tax rates, based on the tax rates and tax laws that have been enacted or substantively enacted at the balance sheet date.

b. Current CIT expense and deferred CIT expense

Current CIT expense is determined based on taxable income in the year and the CIT rate in the current year.

Deferred CIT expense is determined based on deductible temporary differences, taxable temporary differences and CIT rate.

Current CIT expense is not offset against deferred CIT expense.

2.17. Related parties

Parties are considered to be related if a party has control over the other party or exercises significant influence over the other party in making financial and operating decisions. Related parties of the Company include:

- Enterprises that directly or indirectly through one or more intermediaries' control, or are controlled by, or are under common control with the Company, including parent companies, subsidiaries and associates;

- Individuals who directly or indirectly hold voting rights of the Company that gives them significant influence over the Company, key management personnel of the Company, and their close family members;
- Enterprises in which the above individuals directly or indirectly hold a significant part of the voting rights or have significant influence over such enterprises.

In considering each relationship with a related party for the preparation and presentation of the financial statements, the Company pays attention to the substance of the relationship rather than the legal form.

Financial assets and liabilities have not been measured at fair value at the balance sheet date because Circular No. 210/2009/TT-BTC and applicable regulations require the presentation of financial statements and disclosures for financial instruments but do not provide equivalent guidance for the fair value measurement and recognition of financial assets and liabilities, except for provisions for doubtful debts and provisions for impairment of securities investments as detailed in the relevant Notes.

No. 11.24, 11th floor, Golden King building, 15
Nguyen Luong Bang, Tan My Ward, Ho Chi

For the period from January 01, 2025 to June 30, 2025

Financial risk management

The Company's financial risks include market risk, credit risk and liquidity risk. The Company has established a control system to ensure an appropriate balance between the cost of risk exposure and the cost of risk management. Management is responsible for monitoring risk management to ensure an appropriate balance between risks and risk control.

Market risk

The Company's business is primarily exposed to risks from changes in prices, exchange rates and interest rates.

Price risk

The Company is exposed to equity price risks arising from short-term and long-term equity investments because it is uncertain about the future price of the investment shares. Long-term equity investments are held for long-term strategic purposes, and the Company has no plans to sell such investments at the balance sheet date.

Foreign exchange risk

The Company is exposed to foreign exchange risk due to the fluctuations in the fair value of future cash flows of a financial instrument following changes in foreign exchange rates when the Company's loans, revenues and expenses are denominated in currencies other than Vietnamese dong.

Interest rate risk

The Company is exposed to interest rate risk due to fluctuations in the fair value of future cash flows of a financial instrument due to changes in market interest rates when the Company has time or demand deposits, loans and debts at floating interest rates. The Company manages interest rate risk by analyzing the competition in the market to obtain favourable interest rates for the Company's purposes.

Credit risk

Credit risk is the risk that a party to a financial instrument or contract will not meet its obligations under a financial instrument or contract, resulting in a financial loss for the Company. The Company is exposed to credit risk from its operating activities (primarily trade receivables) and financing activities (including bank deposits, loans and other financial instruments).

Total	5,433,460,368	33,000,000,000	-	38,433,460,368

Liquidity risk

Liquidity risk is the risk that the Company has difficulty in fulfilling its financial obligations due to lack of funds. The Company's liquidity risk arises mainly from the fact that financial assets and financial liabilities have different maturities.

The maturity of financial liabilities based on contractually expected payments (based on cash flows of principal) is as follows:

	1 year or less	1 year to 5 years	More than 5 years	Total
	VND	VND	VND	VND
Closing amount				
Loans and liabilities	-	-	-	-
Trade payables and other payables	4,318,029,949	-	-	4,318,029,949

Total	4,556,779,730	-	-	4,556,779,730

The Company believes that the concentration of risk with respect to debt servicing is under its control. The Company is able to pay its debts as they fall due from cash flows from operations and proceeds from maturing financial assets.

24. Segment reporting

Segment reporting by geographical area (Domestic and foreign operations)

The Company only operates within Vietnam.
