NOTES TO THE FINANCIAL STATEMENTS FOR THE SECOND QUARTER OF 2025 (continued)

(These notes are an integral part and should be read in conjunction with the accompanying financial statements)

II. Accounting period, currency used in accounting

1. Accounting period

The Company's accounting period begins on January 1 and ends on December 31 of each year. The financial statements for the second quarter of 2025 are prepared for the accounting period from April 1, 2025 to June 30, 2025.

The operating period from April 4, 2016 to December 31, 2016 is the first operating period when the Company officially transformed from a single member limited liability company to a joint stock company.

2. Accounting currency

The accounting currency is Vietnamese Dong ("VND"), accounted according to the original cost principle, in accordance with Vietnamese Accounting Standards, Vietnamese accounting regimes for enterprises and legal regulations related to the preparation and presentation of financial statements.

III. Applicable Accounting Standards and Regimes

1. Applicable accounting regime

The Company applies the Accounting regime for enterprises issued under Circular No. 200/2014/TT-BTC dated December 22, 2014 of the Ministry of Finance guiding the Accounting regime for enterprises and Circular No. 53/2016/TT-BTC dated March 21, 2016 of the Ministry of Finance revising several articles of Circular No. 200/2014/TT-BTC.

2. Declaration on compliance with Accounting Standards and Regimes

The Company's Financial Statements are prepared and presented in accordance with current Vietnamese Accounting Standards and Vietnamese Accounting Regime for Enterprises and relevant legal regulations.

IV. Summary of significant accounting policies

1. Types of exchange rates applied in accounting

The exchange rate for converting transactions generated during the period in foreign currencies is the exchange rate with the Joint Stock Commercial Bank for Foreign Trade of Vietnam - Hanoi Branch.

The exchange rate when revaluating items dominated in foreign currency at the time of preparing the Financial Statements is the exchange rate announced by the Joint Stock Commercial Bank for Foreign Trade of Vietnam - Hanoi Branch and An Binh Commercial Joint Stock Bank - Hanoi Branch.

Of which:

The exchange rate when revaluating items dominated in foreign currency classified as assets is the buying rate of the Joint Stock Commercial Bank for Foreign Trade of Vietnam - Hanoi Branch and An Binh Commercial Joint Stock Bank - Hanoi Branch.

The exchange rate when revaluing items dominated in foreign currency classified as liabilities is the selling rate of the Joint Stock Commercial Bank for Foreign Trade of Vietnam - Hanoi Branch.

2. Principles for recognition of cash and cash equivalents

Cash is a synthetic criterion indicating the total amount of cash available to the company at the reporting time, including cash on hand of the company, demand bank deposits, recognized and reported in Vietnamese Dong (VND), in accordance with regulations of the Accounting Law No. 88/2015/QH13 dated November 20, 2015 effective from January 1, 2017.

Cash equivalents are short-term investments with a recovery or maturity period not exceeding 3 months, which can be easily converted into a certain amount of cash and bear no risk of conversion into cash from the date of purchasing the investment to the time of preparing the Financial Statements, in accordance with regulations of Vietnamese Accounting Standard No. 24 - Cash Flow Statement.

FINANCIAL STATEMENTS

FOR THE SECOND QUARTER OF 2025

Address: 8th Floor, Sky Tower Complex, No. 88 Lang Ha, Lang Ward, Hanoi City

Form No. B 09a - DN

NOTES TO THE FINANCIAL STATEMENTS FOR THE SECOND QUARTER OF 2025 (continued)

(These notes are an integral part and should be read in conjunction with the accompanying financial statements)

3. Principles for accounting of financial investments

Held-to-maturity investments

Held to maturity investments consist of investments that the Company intends and is able to hold to maturity. The Company's held-to-maturity investments are term bank deposits recognized from the date of deposit.

Investments in associates

An associate is an entity in which the Company has significant influence and that is neither a subsidiary nor a joint venture of the Company. Significant influence is the power to participate in making financial and operating policy decisions of the investee but is not control or joint control over those policies.

The Company initially recognizes its investment in an associate at cost. The Company accounts in the Income Statement the portion of accumulated net profits of the investee arising subsequent to the date of investment. Other amounts received by the Company in addition to the profits distributed are considered as the recovery of investments and are recognized as a deduction from the original cost of the investment.

Investments in equity instruments of other entities

Investments in equity instruments of other entities represent investments in equity instruments but the Company has no control, joint control or significant influence over the investee.

Investments in equity instruments of other entities are stated at historical cost less provisions for devaluation of investments.

Method of making provisions for devaluation of investments

Investments in associates and capital contributions in other entities are presented in the Balance Sheet at historical cost less provisions for devaluation (if any). Provisions for devaluation of investment loss in these companies are made in accordance with Circular No. 228/2009/TT-BTC dated December 7, 2009 of the Ministry of Finance on "Guiding the regime of making and using provisions for devaluation of inventories, losses of financial investments, doubtful receivables and warranties for products, goods and construction works at enterprises", Circular No. 89/2013/TT-BTC dated June 28, 2013 of the Ministry of Finance revising Circular No. 228/2009/TT-BTC and current accounting regulations.

4. Principles for accounting of receivables

Receivables are amounts that are recoverable from customers or other entities. Receivables consist of trade and other receivables. Receivables are presented at book value minus provisions for doubtful receivables. Receivables are not recorded higher than the value to be recovered.

Trade receivables include receivables of a commercial nature, arising from purchase-sale transactions.

Other receivables include receivables of a non-commercial nature, not related to purchase-sale transactions.

Receivables are tracked in detail by the entity and terms of the receivables and other factors based on the enterprise's management demands.

FINANCIAL STATEMENTS

MECHANICAL ENGINEERING SERVICE JOINT STOCK COMPANY

FOR THE SECOND QUARTER OF 2025

Address: 8th Floor, Sky Tower Complex, No. 88 Lang Ha, Lang Ward, Hanoi City

Form No. B 09a - DN

NOTES TO THE FINANCIAL STATEMENTS FOR THE SECOND QUARTER OF 2025 (continued)

(These notes are an integral part and should be read in conjunction with the accompanying financial statements)

5. Principles for recognition of inventories

Inventories are measured based on the lower of historical cost and net realizable value. The historical cost of inventories includes costs for direct materials, direct labor and general manufacturing costs incurred in bringing the inventories to their present location and condition. The historical cost of inventories is measured by the weighted average method. Net realizable value is measured by the estimated selling price less the estimated costs of completion and marketing, selling and distribution costs incurred.

Inventory accounting method: The Company applies the perpetual inventory method.

6. Principles for recognition and depreciation of fixed assets

6.1 Principles for recognition and depreciation of tangible fixed assets

Tangible fixed assets are recognized at original cost, stated on the Balance Sheet according to the critereia of original cost, accumulated depreciation and residual value.

The recognition of tangible fixed assets and depreciation of tangible fixed assets shall comply with Vietnamese Accounting Standard No. 03 - Tangible fixed assets, Circular No. 200/2014/TT-BTC dated December 22, 2014 of the Ministry of Finance guiding the accounting regime for enterprises, Circular No. 45/2013/TT-BTC dated April 25, 2013 guiding the regime of management, use and depreciation of fixed assets, Circular No. 147/2016/TT-BTC dated October 13, 2016 revising several articles of Circular No. 45/2013/TT-BTC and Circular No. 28/2017/TT-BTC dated April 12, 2017 to revise several articles of Circulars No. 45/2013/TT-BTC and 147/2016/TT-BTC.

The original cost of a tangible fixed asset consists of the purchase price (less any trade discounts or rebates), taxes and any costs directly attributable to bringing the asset to its ready-to-use condition.

Expenses incurred after the initial recognition of tangible fixed assets are recognized as an increase in the original cost of the asset when it is certain that these costs will increase future economic benefits. Expenses incurred that fail to satisfy the above conditions are recognized by the company as production and business expenses during the period.

The company applies the straight-line depreciation method for tangible fixed assets. Tangible fixed asset accounting is classified according to groups of assets with the same nature and purpose of use in the company's production and business, including:

Type of fixed asset	Depreciation period (years)
Buildings and structures (*)	05 - 50
Transportation vehicles, transmission equipment	06-10
Equipment, tools for management	03-10
Other fixed assets (**)	Not depreciated

- (*) Fixed assets in the group of Buildings and structures not depreciated are "Costs of land clearance, investment in construction of the Waste Treatment Plant Project" with a value of 17,607,916,631 VND. These are costs incurred related to compensation for crops to farmers and site clearance for land areas of the Waste Treatment Plant Construction Project. These costs have been settled and handed over by the State to the Company for management along with the Project land. This is an asset assigned by the State for management and currently not directly serving production and business operations. Therefore, the Company does not depreciate this asset.
- (**) Other fixed assets are "Perennial trees at the Waste Treatment Plant" of the Company when equitizing the Enterprise, which was valued at 651,085,030 VND. However, in reality, these trees are no longer valuable, so the Company does not depreciate these assets.

Address: 8th Floor, Sky Tower Complex, No. 88 Lang Ha, Lang Ward, Hanoi City FOR THE SECOND QUARTER OF 2025

Form No. B 09a - DN

NOTES TO THE FINANCIAL STATEMENTS FOR THE SECOND QUARTER OF 2025 (continued)

(These notes are an integral part and should be read in conjunction with the accompanying financial statements)

6.2 Principles for recognition and method for depreciation of intangible fixed assets

Intangible fixed assets are the ownership value of 1,000 m2 of office floor space worth 13,435,977,000 VND according to Business Cooperation Contract No. 27/2015/HTKD/CD-DXMB&MS dated March 31, 2015 to implement the Mixed-use Area project (High-rise residential area combined with commercial services, low-rise housing and kindergarten) in Sai Dong Street, Viet Hung Ward, Long Bien District, Hanoi City. The Company will manage and use this asset in the future when implementing the business cooperation contract and an increase in State capital has been recognized with the corresponding value according to Decision No. 3468/QD-UBND dated July 24, 2015 of Hanoi City People's Committee on approving the enterprise value and equitization plan of the Mechanical Engineering Service One Member Limited Liability Company. The Company does not depreciate this intangible fixed asset.

7. Principles for accounting of business cooperation contracts

A business cooperation contract (BCC) means a contractual agreement between two or more parties to jointly carry out economic activities without forming an independent legal entity. This operation can be jointly controlled by the capital contributors under the joint venture agreement or controlled by one of several participants.

In any cases, when receiving money or assets from other entities in the BCC, they should be recorded to liabilities, not be recorded to equity.

Mechanical Engineering Service Joint Stock Company signed Consortium Contract No. 08/2011/HD-HTKD dated April 5, 2011 with Indochina Resources Development Joint Stock Company on contributing capital for investment in building the Project on a land area of 149,566 m2 in Ta Thanh Oai commune, Thanh Tri, Hanoi. Previously, this land was assigned by Hanoi City People's Committee to Mechanical Engineering Service One Member Limited Liability Company - now Mechanical Engineering Service Joint Stock Company as the investor to build a waste treatment plant for the city, but up to now, the construction of a waste treatment plant in this land is no longer suitable. Hanoi City People's Committee issued a policy to allow the Company to study and propose changing the land use purpose to a new project in accordance with the planning. According to this Consortium Contract, Indochina Resources Development Joint Stock Company contributed 49% of the total investment capital. The stake equal to 51% of the total investment capital of the Project includes the Company's contributed capital and capital from other partners that was mobilized and directly contracted by the Company. The profit used as the basis for calculating the income interest is the profit earned by the Project, less the obligations to the State according to current regulations and other reasonable expenses (if any). The Parties are entitled to income interest according to the capital contribution ratio stated in the Contract. In fact, as of June 30, 2025, Indochina Resources Development Joint Stock Company has not yet contributed capital to invest in the project. The value of the capital contribution equivalent to 49% of this Company is 21,050,429,167 VND, which is recognized by the Company as other long-term receivables corresponding to the Owner's stake approved under the Equitization Decision 1366/QD-UBND dated March 18, 2016 of Hanoi City People's Committee.

8. Principles for accounting of liabilities

Liabilities are amounts payable to suppliers and other entities. Liabilities consist of trade and other payables. Unrecognized liabilities are lower than payment obligations.

Trade payables consist of commercial payables arising from transactions of purchasing goods, services, assets and the seller is an independent entity from the buyer, including payables between the parent company and its subsidiaries.

Other liabilities consist of non-commercial payables, not related to transactions of purchasing, selling, rendering goods and services.

Payables are tracked in detail by each entity and payment term.

FINANCIAL STATEMENTS

MECHANICAL ENGINEERING SERVICE JOINT STOCK COMPANY

FOR THE SECOND QUARTER OF 2025 Address: 8th Floor, Sky Tower Complex, No. 88 Lang Ha, Lang Ward, Hanoi City

Form No. B 09a - DN

NOTES TO THE FINANCIAL STATEMENTS FOR THE SECOND QUARTER OF 2025 (continued)

(These notes are an integral part and should be read in conjunction with the accompanying financial statements)

Liabilities dominated in foreign currency are re-evaluated by the Company at the selling exchange rate of the Joint Stock Commercial Bank for Foreign Trade of Vietnam - Hanoi Branch.

Principles for recognition of equity

The Company owners' paid-in-capital is recognized according to the actual amount contributed by the owners.

Undistributed after-tax profit means the loss from the business operations of the enterprise.

10. Principles and methods for recognition of revenue

The Company's revenue consists of revenue from sales of goods, delivery of public services, construction and installation, trade and office leasing.

Revenue from sales of goods

Revenue from sales of goods and finished products is recognized when the following conditions are simultaneously satisfied:

- + The enterprise has transferred most of the risks and benefits associated with the ownership of the product or goods to the buyer;
- + The enterprise no longer holds the right to manage the goods as the owner of the goods or the right to control the goods;
- + Revenue is measured relatively reliably. When the contract stipulates that the buyer has the right to return the products, goods, purchased under specific conditions, revenue is only recognized when those specific conditions do not exist and the buyer is not entitled to return the products, goods (except in cases where the customer has the right to return the goods in the form of exchange for other goods, services);
- + The enterprise has obtained or will obtain economic benefits from the sale transaction;
- + The costs related to the sale transaction can be measured.

Revenue from service leasing

Revenue for services rendered is recognized when the results of the transaction can be measured reliably. In case the service delivery transaction is related to various periods, revenue is recognized during the period based on the results of the work portion completed at the date of the Balance Sheet of that period. The results of the service delivery transaction are measured when all the following conditions are satisfied:

- + Revenue can be measured relatively reliably. When a contract stipulates that the buyer has the right to return the purchased services under specific conditions, the revenue is only recognized when those specific conditions no longer exist and the buyer has no right to return the services rendered;
- + It is probable that the economic benefits associated with the service delivery transaction will flow to the enterprise;
- + The completed work portion at the Balance Sheet date can be measured reliably; and
- + The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Construction revenue

When the outcome of a contract performance can be estimated reliably:

- + For construction contracts stipulating that the contractor receives payment according to the scheduled progress, the revenue and costs related to the contract are recognized in proportion to the completed work portion as measured by the Enterprise at the end of the financial year.
- + For construction contracts stipulating that the contractor receives payment according to the value of workload performed, the revenue and costs related to the contract are recognized corresponding to the completed work portion confirmed by the customer and stated on the issued invoice.

Increases and decreases in construction volume, proceeds from compensation and other revenues are only recognized as revenue when an agreement was reached with the customer.

FINANCIAL STATEMENTS

Address: 8th Floor, Sky Tower Complex, No. 88 Lang Ha, Lang Ward, Hanoi City FOR THE SECOND QUARTER OF 2025

Form No. B 09a - DN

NOTES TO THE FINANCIAL STATEMENTS FOR THE SECOND QUARTER OF 2025 (continued)

(These notes are an integral part and should be read in conjunction with the accompanying financial statements)

When the outcome of a construction contract cannot be estimated reliably, then:

Revenue is only recognized to the extent of contract costs incurred for which reimbursement is relatively certain.

Contract costs are only recognized as expenses when incurred.

The difference between the total cumulative revenue of a construction contract recognized and the cumulative amount stated on invoices for payment according to the planned progress of the contract is recognized as receivables or payable based on the planned progress of construction contracts.

Financial revenue

Financial revenue means the revenue from interest on bank deposits.

Interest is recognized on an accrual basis, measured based on the balance of deposit accounts and the effective interest rate from time to time.

Advance payments from customers are not recognized as revenue during the period.

11. Principles for recognition of cost of goods sold

Cost of goods sold is recognized and aggregated based on the value and quantity of finished products, goods, and materials sold to customers, consistent with the revenue recognized during the period.

Cost of services rendered is recognized based on the actual costs incurred to complete the service, consistent with the revenue recognized during the period.

Cost of construction and installation activities is recorded according to the actual costs incurred for each project, consistent with the revenue recorded in the period

12. Other accounting principles and methods

12.1 Tax obligations

Value Added Tax (VAT)

The Company applies the declaration and calculation of VAT according to the guidance of current tax laws with VAT rates of 8% and 10%.

Corporate income tax

Corporate income tax represents the total value of current tax payable and deferred tax.

Current tax payable is calculated based on taxable income during the year. Taxable income differs from net profit as reported in the Income Statement because taxable income excludes income or expenses that are taxable or deductible in other years (including losses carried forward, if any) and excludes items that are not taxable or deductible.

The Company applies a corporate income tax rate of 20% on taxable profit

The measurement of the Company's income tax is based on current tax regulations. However, these regulations are subject to change from time to time and the final measurement of corporate income tax depends on the results of the audit by the competent tax authority.

Other taxes

Other taxes and fees are declared and paid by the enterprise to the local tax authority in accordance with current regulations of the State.

- (i) Costs related to the implementation of the Project in Ta Thanh Oai Commune, Thanh Tri, Hanoi. Previously, this land belonged to the waste treatment plant construction project invested by the Company. In 2013, the City issued a policy to research and establish the "Investment Project for Ecological Urban, Commercial Service and Sports Area". All related costs will be collected and allocated to all parties when the Project on this land is approved by the competent authority for implementation.
- (ii) The advance payment of resigned employees. Specifically:
- The advance payment debt of Mr. Pham Thanh Son in the amount of 560,340,000 VND generated in 2002 when Mr. Cao Van Son (Company Director) signed the Land Purchase Contract of Mr. Nguyen Huu Bang through the advance payment of Mr. Pham Thanh Son a company employee. Mr. Pham Thanh Son resigned from the company in 2005. This debt was transferred between the Director of Mechanical Engineering Service Company (Cao Van Son) and the Director of Mechanical Engineering Service One Member Limited Liability Company (Nguyen Quoc Dam) when handing over the Company's transformation in 2005. 2005. In November 2017, Mr. Nguyen Quoc Dam retired, this debt has not been settled. This debt is currently difficult to recover.
- The advance payment debt of Mr. Nguyen Tien Thanh in the amount of 83,676,625 VND generated in 2005 when Mr. Nguyen Tien Thanh was an employee of the Brick Factory. In October 2007, Mr. Nguyen Tien Thanh arbitrarily quit his job at the Company when he was subject to disciplinary measures by the Company for collecting debts for buying bricks from customers but failing to pay to the Company. This debt is currently irrecoverable.
- (iii) The receivable under Consortium Contract No. 08/2011/HD-HTDT dated April 5, 2011 on cooperation in investment in construction, management, operation and business of the Project of Ecological Works, Commercial Services and Sports Complex in Ta Thanh Oai Commune, Thanh Tri District, Hanoi City. This receivable has been recognized as an increase in State capital with a corresponding value according to Decision No. 3468/QD-UBND dated July 24, 2015 of Hanoi City People's Committee on approving the enterprise value and equitization plan of Mechanical Engineering Service One Member Limited Liability Company. On April 4, 2023, Indochina Resources Development Joint Stock Company issued a written confirmation that as soon as the Project was approved by the competent authority, Indochina Resources Development Joint Stock Company was approved as a member to participate in the implementation of the Project, Indochina Resources Development Joint Stock Company undertook to cover all costs as agreed upon in the Investment Cooperation Contract.
