- ✓ Repair of other equipment. Details: repair and maintenance of industrial electrical equipment with voltage up to 110 KV;
- ✓ Other remaining business support service activities not elsewhere classified. Details: Import and export business of all kinds of electrical equipment and insulating materials ;
- ✓ For conditional business lines, enterprises only conduct business when they meet all conditions as prescribed by law.

4. Normal production and business cycle

The Company's normal production and business activities are 12 months.

Average production and business cycle of industry and sector : 12 months.

5. Characteristics of the business 's operations during the accounting period that affect the separate financial statements

During the accounting period, the Company's operations did not have any significant characteristics that affected the Financial Statements. The Company's operations were normal.

6. Business structure

As of June 30, 2025, the Company's office is located at No. 55, K2 Street, Cau Dien Ward, Nam Tu Liem District, Hanoi City.

II. ACCOUNTING PERIOD, CURRENCY UNIT USED IN ACCOUNTING

1. Accounting period.

The Company's second quarter 2025 accounting period begins on April 1, 2025 and ends on June 30, 2025 of the calendar year.

2. Currency used in accounting

The currency used in accounting is Vietnamese Dong (national symbol is "d"; international symbol is "VND").

III. ACCOUNTING STANDARDS AND REGIMES APPLIED

1. Applicable accounting regime

The Company applies the Enterprise Accounting Regime issued under Circular No. 200/2014/TT-BTC dated December 22, 2014 of the Ministry of Finance Guiding the Enterprise Accounting Regime and Circular No. 53/2016/TT-BTC dated March 21, 2016 on amending and supplementing Circular No. 200/2014/TT-BTC issued by the Ministry of Finance.

2. Statement on compliance with Accounting Standards and Regimes

The Company has applied Vietnamese Accounting Standards and documents guiding the Standards issued by the State. Financial statements are prepared and presented in accordance with all provisions of each standard, circulars guiding the implementation of standards and the current applicable Accounting Regime.

IV. ACCOUNTING POLICIES APPLIED

1. Principles of recording cash and cash equivalents

Cash and cash equivalents include cash on hand, bank deposits, short-term investments with maturity of no more than 03 months, highly liquid, easily convertible to known amounts of cash and subject to insignificant risk of conversion to cash.

Amounts of money deposited by other businesses and individuals at the Company are managed and accounted for as the Company's money.

2. Principles of accounting for receivables

The classification of receivables as trade receivables and other receivables is carried out according to the following principles:

a. Receivables from customers include commercial receivables arising from purchase-sale transactions, such as: Receivables from sales, provision of services, liquidation, transfer of assets (fixed assets, financial investments) between the Company and the buyer (an entity independent of the seller, including receivables between the parent company and subsidiaries, joint ventures, and associates). These receivables include receivables from export sales of the consignor through the consignee;

b. Other receivables include non-commercial receivables not related to purchase and sale transactions, such as:

- Receivables generate financial operating revenue, such as: receivables from loan interest, deposits, dividends and distributed profits;
- Amounts paid on behalf of a third party are entitled to be recovered; Amounts the export consignee must collect on behalf of the consignor;
- Non-commercial receivables such as asset lending, receivables for fines, compensation, assets pending settlement, etc.

When preparing the Financial Statement, accountants base on the remaining term of receivables to classify them as long-term or short-term. The receivables indicators of the Balance Sheet may include items reflected in accounts other than receivables, such as: Loans reflected in Account 1283; Deposits and bets reflected in Account 244, advances in Account 141, etc.

3. Principles of inventory recording

a. Principles of inventory recording

The Company's inventories are assets purchased for production or sale in the normal production and business cycle. For unfinished products, if the production and circulation time exceeds a normal business cycle, they are not presented as inventories on the Balance Sheet but presented as long-term assets.

Products, goods, materials, assets kept on deposit, consigned for import and export, processed... that are not owned and controlled by the Company are not reflected as inventory.

Inventories are stated at cost. Where the net realizable value is lower than the cost price, inventories are stated at net realizable value. The cost of inventories comprises purchase costs, conversion costs and other directly attributable costs incurred in bringing the inventories to their present location and condition.

b. Method of calculating inventory value

Inventory value is determined by the weighted average method.

Method of determining the value of unfinished products: unfinished production and business costs are collected according to actual costs incurred for each production stage in the chain.

c. Inventory accounting method

Inventories are accounted for using the perpetual inventory method.

d. Method of setting up inventory price reduction provision

Provision for inventory devaluation is made at 6 months and year-end as the difference between the original cost of inventory and the net realizable value.

Provision for inventory price reduction is made in accordance with Circular 48/2019/TT-BTC dated August 8, 2019 of the Ministry of Finance guiding provisioning.

4. Principles of recording and depreciating fixed assets

Tangible fixed assets and intangible fixed assets are recorded at original cost. During use, tangible fixed assets and intangible fixed assets are recorded at original cost, accumulated depreciation and residual value.

Leased fixed assets are recorded at their original cost at fair value or the present value of the minimum lease payments (excluding VAT) and the initial direct costs incurred in connection with the leased fixed assets. During use, leased fixed assets are recorded at their original cost, accumulated depreciation and residual value.

The Company's fixed asset depreciation is estimated appropriately and implemented using the straight-line method in accordance with Circular No. 45/2013/TT-BTC dated April 25, 2013 of the Ministry of Finance promulgating the regime of management, use and depreciation of fixed assets.

5. Principles of accounting for prepaid expenses

Prepaid expenses that are only related to the production and business costs of one fiscal year or one business cycle are recorded as short-term prepaid expenses and are included in the production and business costs of the fiscal year. Expenses that have been incurred in the fiscal year but are related to the production and business results of many accounting years are recorded as long-term prepaid expenses to be gradually allocated to the business results of the following accounting years.

The calculation and allocation of long-term prepaid expenses into production and business expenses for each accounting period is based on the nature and extent of each type of expense to select a reasonable allocation method and criteria. Prepaid expenses are gradually allocated into production and business expenses using the straight-line method.

6. Principles of accounting for liabilities

The classification of payables as trade payables and other payables is carried out according to the following principles:

a. Payables to sellers include commercial payables arising from transactions of purchasing goods, services, assets and sellers (who are independent entities from the buyer, including payables between parent companies and subsidiaries, joint ventures, and associates). These payables include payables when importing through a consignee (in consignment import transactions);

b. Other payables include non-commercial payables not related to the purchase, sale, or provision of goods and services:

- Payables related to financial expenses, such as: payables for interest, dividends and profits payable, and payables for financial investment activities;
- Amounts payable by third parties; Amounts received by the trustee from related parties for payment as specified in the import-export trust transaction;
- Non-commercial payables such as payables due to borrowed assets, payables for fines, compensation, surplus assets awaiting disposal, payables for social insurance, health insurance, unemployment insurance, union funds, etc.

When preparing financial statements, accountants base on the remaining term of payables to classify them as long-term or short-term. When there is evidence that a loss is likely to occur, accountants immediately record a payable according to the principle of prudence.

Payables in foreign currencies are revalued at the end of the period when preparing the Financial Statements. The actual transaction exchange rate when revaluating payables in foreign currencies at the time of preparing the Financial Statements is the exchange rate announced by the commercial bank where

the enterprise regularly conducts transactions (chosen by the Company when transacting with the payable entity).

7. Principles of recording loans

Loans with repayment period of more than 12 months from the date of preparation of Financial Statements, accountants present as long-term loans and financial lease debts. Loans due for repayment within the next 12 months from the date of preparation of Financial Statements, accountants present as short-term loans and financial lease debts to have a payment plan.

Borrowing costs directly related to the loan (other than interest payable), such as appraisal, auditing, loan application preparation costs, etc., are accounted for in financial expenses. In case these costs arise from a separate loan for the purpose of investment, construction or production of unfinished assets, they are capitalized.

When preparing the Financial Statements, the balance of foreign currency loans is revalued at the actual transaction exchange rate at the time of preparing the Financial Statements. Exchange rate differences arising from the payment and re-evaluation of foreign currency loans at the end of the period are recorded in financial income or expenses.

8. Principles of recognition and capitalization of borrowing costs

Borrowing costs are recorded as production and business expenses in the period when incurred, except for borrowing costs directly related to the investment, construction or production of unfinished assets, which are included in the value of that asset (capitalized) when meeting all the conditions specified in Vietnamese Accounting Standard No. 16 "Borrowing costs".

Borrowing costs directly related to the investment in construction or production of unfinished assets that require a sufficient period of time (over 12 months) to be put to use for the intended purpose or sale are included in the value of that asset (capitalized), including loan interest, allocation of discounts or premiums when issuing bonds, and additional costs incurred in connection with the borrowing process.

For separate loans for construction of fixed assets and investment real estate, interest is capitalized even when the construction period is less than 12 months;

9. Principles of recording payable expenses

Payables for goods and services received from sellers or provided to buyers during the reporting period but not actually paid due to lack of invoices or insufficient accounting records and documents, are recorded in production and business expenses of the reporting period. Accounting for payable expenses into production and business expenses during the period must be carried out according to the principle of matching between revenue and expenses incurred during the period.

The accrued expenses will be settled with the actual expenses incurred. The difference between the provision and the actual expenses will be reversed.

10. Principles of recording equity

a. Principles of recording owner's capital contribution

Owner's equity is recorded at the actual capital contributed by the owner.

b. Principles for recording undistributed profits

Undistributed profit after tax is the profit from the Company's operations after deducting (-) adjustments due to retroactive application of changes in accounting policies and retroactive adjustments of material errors of previous years. Undistributed profit after tax can be distributed to investors based on the capital contribution ratio after being approved by the Board of Directors and after setting aside reserve funds in accordance with the Company's Charter and the provisions of Vietnamese law.

1 1. Principles and methods of revenue recognition

a. Sales revenue

Sales revenue is recognized when all of the following conditions are met:

- The significant risks and rewards of ownership of the product or goods have been transferred to the buyer;
- The Company no longer holds the right to manage the goods as the owner of the goods or the right to control the goods;
- Revenue is measured with relative certainty;
- The Company has obtained or will obtain economic benefits associated with the sale transaction;
- Identify the costs associated with a sales transaction

b. Service revenue

Revenue from rendering of services is recognised when the outcome of the transaction can be estimated reliably. Where the provision of services relates to several periods, revenue is recognised in each period according to the results of the work completed at the date of the Balance Sheet of that period. The outcome of a service provision transaction is recognised when the following conditions are satisfied:

• Revenue is measured with relative certainty;

- It is possible to obtain economic benefits from the transaction of providing that service;
- Determine the portion of work completed on the date of the Balance Sheet;
- Identify the costs incurred for the transaction and the costs to complete the transaction to provide that service.

The portion of service work completed is determined by the method of assessing completed work.

c. Financial revenue

Revenue arising from interest, dividends, distributed profits and other financial revenue is recognized when both (2) of the following conditions are satisfied:

- It is probable that the economic benefits associated with the transaction will flow to the entity;
- Revenue is determined with relative certainty.

Dividends and profits are recognized when the Company is entitled to receive dividends or profits from capital contributions.

d. Other income

Reflects other income outside of the enterprise's production and business activities, including:

- Income from sale and liquidation of fixed assets;
- Income from sale and leaseback of assets;
- Taxes payable when selling goods or providing services but then reduced or refunded (export tax refunded, VAT, special consumption tax, environmental protection tax payable but then reduced);
- Collect third-party compensation to compensate for lost assets (e.g. collect insurance claims, compensation for business relocation and similar amounts);
- Collect fines due to customer breach of contract;
- Other income besides the above.

12. Accounting principles for revenue deductions

Amounts adjusted to reduce sales revenue and service provision arising during the period include: Trade discounts, sales discounts and sales returns.

In case products, goods and services have been consumed in previous periods, and trade discounts, sales discounts or returned goods arise in the following period, the Company shall record a reduction in revenue according to the following principles:

- If products, goods, and services have been consumed in previous periods, and must be discounted, discounted, or returned in the next period but occur before the issuance of the Financial Statement, the accountant considers this an adjusting event that occurs after the date of the Balance Sheet and reduces revenue on the Financial Statement of the reporting period (previous period).
- In case products, goods, and services must be discounted, have trade discounts, or are returned after the issuance of the Financial Statement, the enterprise will record a reduction in revenue for the period in which they arise (the following period).

13. Principles of accounting for cost of goods sold

Reflects the cost of products, goods and services sold during the period.

The provision for inventory devaluation is included in the cost of goods sold based on the quantity of inventory and the difference between the net realizable value and the original cost of inventory.

For the value of inventory loss or damage, accountants immediately calculate it into the cost of goods sold (after deducting compensation, if any).

For direct material costs consumed in excess of normal levels, labor costs, and fixed general manufacturing costs not allocated to the value of products in stock, accountants immediately calculate them into the cost of goods sold (after deducting compensation, if any), even when the products and goods have not been determined to be consumed.

Import tax, special consumption tax, environmental protection tax have been included in the value of purchased goods. If these taxes are refunded when selling goods, they will be recorded as a reduction in the cost of goods sold.

Cost of goods sold expenses are not considered as expenses for calculating corporate income tax according to the provisions of the Tax Law but have full invoices and documents and have been accounted for correctly according to the Company's accounting regime. Accounting expenses are not recorded as a reduction but only adjusted in the corporate income tax settlement to increase the amount of corporate income tax payable.

14. Principles of financial cost accounting

Reflects financial operating expenses including expenses or losses related to financial investment activities, costs of lending and borrowing capital, costs of contributing capital to joint ventures and associations, losses on transferring short-term securities, costs of selling securities; Provision for devaluation of trading securities, provision for losses on investments in other entities, losses arising from selling foreign currencies, exchange rate losses...

Financial expenses are not considered as expenses for calculating corporate income tax according to the provisions of the Tax Law but have full invoices and vouchers and have been accounted for correctly according to the Company's accounting regime. The accounting expenses are not recorded as a reduction but only adjusted in the corporate income tax settlement to increase the amount of corporate income tax payable.

15. Principles of accounting for sales costs and business management costs

Expenses recorded as selling expenses include: Actual expenses incurred in the process of selling products, goods, and providing services, including costs of offering, introducing products, advertising products, sales commissions, product and goods warranty costs, preservation, packaging, transportation costs, etc.

Expenses recorded as business management expenses include: Expenses for salaries of employees in the business management department (salaries, wages, allowances, etc.); social insurance, health insurance, union fees, unemployment insurance for business management employees; expenses for office materials, labor tools, depreciation of fixed assets used for business management; land rent, business license tax; provision for bad debts; outsourced services (electricity, water, telephone, fax, property insurance, fire and explosion insurance, etc.); other cash expenses (reception, customer conferences, etc.)

Sales expenses and business management expenses are not considered expenses for calculating corporate income tax according to the provisions of the Tax Law but have full invoices and vouchers and have been accounted for correctly according to the Company's accounting regime. The Company does not reduce accounting expenses but only adjusts them in the corporate income tax settlement to increase the amount of corporate income tax payable.

16. Principles and methods of recording current corporate income tax expenses

Current corporate income tax expense is the amount of corporate income tax payable calculated on taxable income in the year and the current corporate income tax rate. Currently, the Company is applying a corporate income tax rate of 20%.

17. Other accounting principles and methods

Stakeholders

Enterprises and individuals that directly or indirectly through one or more intermediaries, control, or are controlled by, or are under common control with, the Company, including holding companies, subsidiaries and fellow subsidiaries are related parties. Associates, individuals owning, directly or indirectly, an interest in the voting power of the Company that gives them significant influence over the enterprise, key management personnel including the Board of Directors and officers of the Company, close members of the families of these individuals or these associates or companies associated with these individuals also constitute related parties.

In considering each possible related party relationship, attention must be given to the substance of the relationship and not merely its legal form.

VII. OTHER INFORMATION

1 . Contingent Liabilities, Commitments and Other Information:

There are no contingent liabilities arising from past events that could affect the information presented in the Financial Statements that the Company does not control or has not recorded.

2 . Events occurring after the balance sheet date

There have been no events that could affect the information presented in the Financial Statements or have or could have a significant impact on the Company's operations.

3 . Information about related parties

Transactions with other related parties:

Board of Directors and General Director's income in the second quarter of 2025:

| TT | Part | Income |
|----|-------------------------------------|-------------|
| 1 | Board of Directors, Executive Board | 399,468,703 |
| 2 | Board of Control | |
| | Total | 399,468,703 |

4 . Department report

The Company does not prepare segment reports because it does not satisfy one of the three conditions for preparing segment reports by business sector or geographical area as prescribed in Circular 20/2006/TT-BTC dated March 26, 2006 of the Ministry of Finance on guiding the implementation of (06) accounting standards issued under Decision No. 12/2005/QD-BTC dated February 15, 2005 of the Minister of Finance.

6 . Comparison information

Comparative figures are figures on the 2nd Quarter 2024 Financial Report of Hanoi Transformer and Electrical Materials Manufacturing Joint Stock Company prepared by the Company itself.

7 . Information on ongoing operations

There have been no events which may cast significant doubt on the Company's ability to continue as a going concern and the Company has no intention or necessity to cease operations or to reduce the scale of its operations significantly.

Hanoi, July 11, 2025
