7. Employees

At the end of the accounting period, the Company had 327 employees (at the beginning of the year, there were 319 employees).

II. FINANCIAL YEAR AND ACCOUNTING CURRENCY

1. Fiscal year

The Company's fiscal year begins on January 1 and ends on December 31.

2. Accounting currency

The currency used in accounting records and financial reporting is Vietnamese Dong.

III. STANDARDS AND APPLICABLE ACCOUNTING POLICIES

1. Applicable Accounting Policies

The Company applies the Vietnamese Enterprise Accounting System, issued under Circular No. 200/2014/TT/BTC dated December 22, 2014 of the Ministry of Finance guiding the enterprise accounting system and circulars guiding the implementation of enterprise accounting standards and regimes of the Ministry of Finance.

2. Declaration of compliance with Accounting Standards and Accounting System

The Company has complied with the requirements of the Vietnamese Accounting Standards and Enterprise Accounting Regime issued under Circular No. 200/2014/TT-BTC dated December 22, 2014 of the Ministry of Finance as well as the circulars guiding the implementation of standards and enterprise accounting of the Ministry of Finance in preparing financial statements.

IV. APPLICABLE ACCOUNTING POLICIES

1. Basis for preparation of financial statements

The financial statements are presented on the accrual basis of accounting (except for cash flow information).

2. Cash and cash equivalents

Cash includes cash, demand deposits and cash in transit. Cash equivalents are short-term investments with a maturity of no more than 3 months from the date of investment, which can be easily converted into a known amount of cash and are subject to no risk of change in value at the reporting date, and are recorded in accordance with the provisions of Vietnamese Accounting Standards.

3. Equity investments in other entities

- Reflects investments in which the Company directly or indirectly holds from 20% to less than 50% of the voting rights of the investee (associated company) without other agreements.

An associate is an enterprise in which the Company has significant influence but not control over the financial and operating policies. Significant influence is the power to participate in making financial and operating policy decisions of the investee but not control over those policies.

- Capital investments in other entities are initially recorded at cost, including the purchase price or capital contribution plus costs directly related to the investment. In case of investment in non-monetary assets, the cost of the investment is recorded at the fair value of the non-monetary assets at the time of occurrence.

Provision for losses on other capital investments is the larger difference between the original cost and the market value of the investment or the Company's ownership portion calculated according to the accounting books of the investee, set up in accordance with the provisions of the current corporate accounting regime.

4. Receivables and provision for doubtful debts

- Receivables are tracked in detail by original term and remaining term at the reporting time.

Receivables are recorded at no more than their recoverable value. Provision for doubtful debts is made for receivables that are overdue for six months or more or receivables that are not yet due for payment but are unlikely to be collected on time in accordance with the provisions of the current corporate accounting regime.

5. Inventories

Inventories are determined on the basis of original cost. Original cost of inventories includes purchase cost and other directly relevant costs incurred in bringing the inventories to their present location and condition.

- The original cost of inventories is calculated using the weighted average method and is accounted for using the perpetual inventory method.

- Provision for inventory devaluation is the difference between the original cost of inventory and their net realizable value at the end of the accounting period, made in accordance with the provisions of the current corporate accounting regime.

6. Tangible fixed assets and depreciation

Fixed assets are stated at original cost minus accumulated depreciation. The original cost of fixed assets includes all costs incurred by the Company to acquire fixed assets up to the time the asset is put into use. Expenses incurred after initial recognition are only increased in the original cost of fixed assets if they certainly increase future economic benefits from the use of the asset. Expenses incurred that do not satisfy the above conditions are recorded as business expenses in the period.

- When tangible fixed assets are sold or liquidated, their original cost and accumulated depreciation are written off and any gain or loss arising from their disposal is recognized in income or expenses in the period.

- Fixed assets are depreciated using the straight-line method based on their estimated useful lives according to current regulations. Number of years of depreciation for each type of fixed asset:

<u>Year of fixed assets</u>	<u>Years</u>
Houses, buildings	5 -> 25
Machinery and equipment	3 -> 15
Transmission media	6 -> 10
Management equipment and tools	3 -> 6

7. Intangible assets and amortization

Intangible fixed assets represent the value of land use rights, computer software and other intangible assets presented at cost less accumulated depreciation.

- Land use rights with no time limit are not amortized. Land use rights with a term limit are allocated according to the term specified on the land use rights certificate.

- Computer software is amortized using the straight-line method over a period of 3 to 5 years.

8. Construction in progress

Construction in progress costs reflect directly related costs involved in the process of purchasing fixed assets, constructing new or repairing, renovating, expanding works, and installing equipment to serve business operations.

9. Long-term prepaid expenses

Prepaid expenses include actual expenses that have been incurred but are related to the business performance of many accounting periods such as: Fixed asset rental costs, fixed asset repairs, tools, etc.

10. Payables

Liabilities and accruals are recognized for amounts to be paid in the future for goods and services received. Accruals are recognized based on reasonable estimates of the amounts to be paid.

11. Owners' equity

Owner's equity: Recorded according to the actual capital contributed by shareholders.

12. Revenue

12.1. Revenue from sale of goods

- The company has transferred the significant risks and rewards of ownership of the products or goods to the buyer.
- The company no longer holds the right to manage the goods as the owner of the goods or the right to control the goods.
- Revenue is determined relatively certainly
- The Company has obtained or will obtain economic benefits from the sale transaction; and
- Identify costs associated with sales transactions.

12.2. Revenue from rendering of services

- Revenue is determined relatively reliably when the contract stipulates that the buyer has the right to return the purchased service under specific conditions. Revenue is only recognized when those specific conditions no longer exist and the buyer is not entitled to return the service provided.
- The company has or will obtain economic benefits from the transaction of providing that service.
- Identify the portion of work completed at the time of reporting.

Determine the costs incurred for the transaction and the costs to complete the transaction to provide that service.

- In case the service is performed over many periods, the revenue recorded in the period is based on the results of the work completed at the end of the accounting period.

12.3. Financial income

- Financial revenue includes interest on deposits, loans; interest on deferred payment sales, payment discounts; dividends, and shared profits.

Other income reflects income arising from events or transactions separate from the Company's normal business operations, in addition to the above revenues.

13. Expenses

Expenses are amounts that reduce economic benefits and are recognized at the time the transaction occurs or when it is relatively certain that they will arise in the future, regardless of whether money has been spent or not.

14. Corporate income tax

- Corporate income tax expense includes current income tax and deferred income tax.

Current income tax is the tax calculated on taxable income. Taxable income differs from accounting profit due to adjustments for temporary differences between tax and accounting, non-deductible expenses as well as adjustments for non-taxable income and losses carried forward.

Deferred income tax is the income tax payable or recovered from the enterprise due to temporary differences between the book value of assets and liabilities for financial reporting purposes and the tax basis. Deferred income tax liabilities are recognized for all taxable temporary differences. Deferred income tax assets are recognized only when it is probable that future taxable profits will be available against which the deductible temporary differences can be utilized.

The carrying amount of deferred tax assets is reviewed at the end of the reporting period and reduced to the extent that it is no longer probable that sufficient taxable profit will be available to allow the benefit of part or all of that deferred tax asset to be utilised. Previously unrecognised deferred tax assets are reviewed at the end of the reporting period and recognised to the extent that it is probable that sufficient taxable profit will be available to utilise the unrecognised deferred tax assets.

Deferred income tax assets and liabilities are measured at the tax rates that are expected to apply in the year when the asset is realised or the liability settled, based on tax rates that have been enacted at the balance sheet date. Deferred income tax is recognised in the income statement and is dealt with directly in equity, except when it relates to items charged or credited directly to equity.

15. Related parties

Enterprises and individuals that directly or indirectly through one or more intermediaries have the right to control the Company or are controlled by the Company, or are under common control with the Company, including the Parent Company, Subsidiaries and Affiliates are called related parties. Affiliates, individuals who directly or indirectly hold the Company's voting power and have significant influence over the Company, key management personnel and close family members or affiliates of these individuals are also considered related parties.

In considering the relationship of related parties, attention is paid to the substance of the relationship rather than to the legal form.
