Head office: No. 2, Ngo Quyen Street, Cam Thuong Ward, Hai Duong City, Hai Duong Province. *As of July 1, 2025, the address has been changed to: No. 2 Ngo Quyen Street, Thanh Dong Ward, Hai Phong City.*

Factory: No. 37, Ho Chi Minh Avenue, Nguyen Trai Ward, Hai Duong City, Hai Duong Province. *As of July 1, 2025, the address has been changed to: No. 37, Ho Chi Minh Avenue, Thanh Dong Ward, Hai Phong City.*

The Company's charter capital is: VND 136,800,000,000 (*One hundred thirty-six billion, eight hundred million VND*) equivalent to 13,680,000 shares, with a par value of VND 10,000 per share.

The Company's shares were officially registered for trading at the Hanoi Stock Exchange (now the Hanoi Stock Exchange) from October 10, 2006 with the stock code CTB.

Principal activities

The company operates in the field of: Production and trading.

Business lines

The main business activities of the Company include:

- Designing and manufacturing pumps, compressors, other taps and valves, various types of industrial fans, and water turbines;
- Casting of iron and steel; casting of non-ferrous metals including bronze, cast iron, zinc, tin, aluminum, and other alloys;
- Manufacturing of motors, generators, transformers, electrical distribution and control equipment;
- Manufacturing of metal structures; forging; metal stamping, pressing and rolling; powder metallurgy; mechanical processing; metal surface treatment and coating;
- Manufacturing of lifting and handling equipment;
- Repair of prefabricated metal products; repair of machinery, electrical equipment, and other specialized equipment;

- Installation of industrial machinery and equipment; drainage and wastewater treatment systems; installation of electrical systems;
- Wholesale of machinery, equipment, and spare parts;
- Freight transportation by all types of trucks (excluding specialized vehicles);
- Inspection and analysis of metal components;
- Manufacturing of seals, gaskets, and accessories for pumps;
- Installation of water supply and drainage systems, heating and air-conditioning systems;
- Construction of residential and non-residential buildings;
- Rental of cars and forklifts (excluding specialized vehicles);
- Construction of railways, roads, electrical works, water supply and drainage systems, telecommunications and communication infrastructure, other public utility works, hydraulic works, mining, and manufacturing facilities;
- Demolition, site preparation, construction finishing works, and other specialized construction activities.

II. ACCOUNTING PERIOD AND CURRENCY USED IN ACCOUNTING

The Company's fiscal year is based on the calendar year, starting from January 1st and ending on December 31st of each year.

The currency used for accounting records is the Vietnam Dong (VND).

III. ACCOUNTING STANDARDS AND REGIMES APPLIED

1. Accounting regime

The Company applies the Enterprise Accounting Regime issued under Circular No. 200/2014/TT-BTC dated December 22, 2014 by the Ministry of Finance along with other amendments and supplements.

2. Declaration on compliance with Accounting Standards and Accounting Regime

The Company has adopted the Vietnamese Accounting Standards (VAS) and the relevant guidelines issued by the Government. The financial statements are prepared and presented in accordance with the requirements of each standard, the guidance circulars for implementation of the standards, and the current accounting regime being applied.

IV. ACCOUNTING POLICIES

1. Financial Instruments

Initial Recognition

Financial Assets

The Company's financial assets include cash and cash equivalents, trade and other receivables, loans

granted, and short-term and long-term investments. At initial recognition, financial assets are measured at purchase price/issuance cost plus any directly attributable transaction costs incurred in connection with the acquisition or issuance of such financial assets.

Financial Liabilities

The Company's financial liabilities include borrowings, trade and other payables, and accrued expenses. At initial recognition, financial liabilities are measured at issuance cost plus any directly attributable transaction costs incurred in connection with the issuance of such financial liabilities.

Subsequent Measurement

Currently, there are no applicable regulations on the remeasurement of financial instruments after initial recognition.

2. Foreign currency transactions

Actual exchange rates used for foreign currency transactions incurred during the year are determined as follows:

- The actual exchange rate is the rate stipulated in the foreign currency purchase or sale contract between the Company and the commercial bank.
- For capital contributions or receipt of capital contributions, the exchange rate is the buying rate of the bank where the Company opens an account to receive capital from the investor, as of the contribution date.
- For the recognition of receivables, the exchange rate is the buying rate of the commercial bank designated by the Company for the customer to make the payment, at the transaction date.
- For the recognition of payables, the exchange rate is the selling rate of the commercial bank with which the Company expects to transact, at the transaction date.
- For asset purchases or immediate payments in foreign currency, the exchange rate is the buying rate of the commercial bank through which the Company makes the payment.

Actual exchange rates used for revaluation of monetary items denominated in foreign currencies at the reporting date:

- For monetary assets: the buying exchange rate of the commercial bank;
- For foreign currency deposits: the buying rate of the bank where the Company maintains the foreign currency account;
- For monetary liabilities: the selling exchange rate of the commercial bank with which the Company frequently transacts.

All foreign exchange differences arising during the period, including those from revaluation of foreign currency-denominated monetary items at the end of the reporting period, are recognized in the Company's profit or loss for the accounting period.

3. Cash and cash equivalents

Cash includes cash on hand, non-term bank deposits, monetary gold used as a store of value (excluding gold classified as inventory intended for use as raw materials in production or for sale as goods).

Cash equivalents are short-term investments with original maturities of no more than three (03) months, that are highly liquid, readily convertible to known amounts of cash, and subject to an insignificant risk of changes in value.

4. Financial investments

Trading securities are recorded at historical cost, which includes the purchase price plus any associated transaction costs (if any), such as brokerage fees, transaction charges, information provision costs, taxes, duties, and bank fees. The historical cost of trading securities is determined based on the fair value of the consideration paid at the transaction date.

Held-to-maturity investments include term deposits (including treasury bills and promissory notes), bonds, and redeemable preference shares issued with a mandatory repurchase obligation at a specified future date, as well as loans held to maturity for the purpose of earning periodic interest and other held-to-maturity investments.

Investments in subsidiaries, joint ventures, and associates are recorded at historical cost.

Investments in equity instruments of other entities in which the Company does not have control, joint control, or significant influence are recorded at historical cost if the investment is made in cash, or at revalued cost if the investment is made in non-monetary assets.

Dividends received in the form of shares are only recognized in terms of the number of shares received, without recognizing an increase in the carrying amount of the investment or finance income.

Exchanged shares are recognized at their fair value at the date of exchange. Fair value is determined as follows: for listed shares, it is the closing price on the stock exchange; for shares traded on UPCOM, it is the UPCOM closing price; and for unlisted shares, it is the contractually agreed price or the book value at the time of exchange.

Provision for impairment of investments is made at year-end as follows:

- For trading securities: the provision is based on the difference between the historical cost recorded in the accounting books and the market value at the provision date, if the cost is higher.
- For long-term investments (not classified as trading securities) without significant influence: if the investment is in listed shares or fair value can be reliably determined, the provision is based on market value; if fair value is not determinable, the provision is based on the investee's financial statements at the time of provision.
- For held-to-maturity investments: recoverability is assessed to determine provisions for doubtful debts in accordance with applicable regulations.

5. Receivables

Receivables are tracked in detail based on maturity terms, counterparties, currencies, and other management requirements of the Company.

Provision for doubtful debts is made for: (i) overdue receivables as specified in economic contracts, loan agreements, contractual commitments, or debt acknowledgements; and (ii) receivables that are not yet due but are deemed unlikely to be collected. The provision for overdue receivables is determined based on the original repayment schedule stated in the initial sales contract, regardless of any subsequent extensions agreed upon by the parties. Provisions are also made for receivables not yet due if the debtor is bankrupt, undergoing dissolution procedures, missing, or absconded.

6. Inventories

Inventories are recognized at cost. In cases where the net realizable value is lower than the cost, inventories are stated at their net realizable value. Cost of inventories includes purchase cost, processing cost, and other direct costs incurred to bring the inventories to their present location and condition.

Inventory valuation is based on the weighted average method.

The Company applies the perpetual inventory method for inventory accounting.

Method of determining work-in-progress at period-end: Production-in-progress is accumulated based on the cost of main raw materials for each unfinished product.

Provision for inventory devaluation is made at the end of the period based on the difference between the carrying amount and the net realizable value when the former is higher.

7. Fixed Assets, Finance Leases, and Investment Properties

In compliance with Circular No. 45/2013/TT-BTC dated April 25, 2013; Circular No. 147/2016/TT-BTC dated October 13, 2016 and Circular No. 28/2017/TT-BTC dated April 12, 2017 of the Ministry of Finance, which provides guidance on the management, use, and depreciation of fixed assets:

Tangible and intangible fixed assets are recognized at historical cost. During their useful lives, fixed assets are recorded at cost, accumulated depreciation, and net book value. Depreciation is calculated using the straight-line method. Estimated useful lives are as follows:

- | | |
|-----------------------------|---------------|
| • Buildings and structures: | 05 – 25 years |
| • Machinery and equipment: | 04 – 08 years |
| • Transportation vehicles: | 05 – 10 years |
| • Office equipment: | 03 – 08 years |

The Company's land use rights are classified as indefinite-term land use rights, and therefore are not depreciated.

8. Prepaid expenses

Expenses incurred that relate to multiple accounting periods are recorded as prepaid expenses and gradually allocated to business results over subsequent periods.

The allocation of long-term prepaid expenses to each accounting period is based on the nature and significance of each expense, applying a reasonable allocation method and basis. Prepaid expenses are allocated using the straight-line method.

Goodwill arising from the equitization of state-owned enterprises is amortized over a period not exceeding 3 years.

9. Liabilities

Liabilities are tracked based on the payment term, creditor, currency, and other elements in accordance with the Company's management requirements.

10. Borrowings and Finance Lease Liabilities

The value of financial leasing liabilities is the total amount payable calculated by the present value of the minimum lease payments or the fair value of the leased asset.

Borrowings and finance lease liabilities are monitored by lender, loan agreement, and repayment term. For borrowings or liabilities denominated in foreign currencies, detailed tracking is performed in original currency.

11. Borrowing Costs

Borrowing costs are recognized as expenses in the period in which they are incurred, except for those directly attributable to the acquisition, construction, or production of a qualifying asset, which shall be capitalized when all conditions stated in Vietnamese Accounting Standard No. 16 "Borrowing Costs" are satisfied.

For specific-purpose loans used to construct fixed assets or investment properties, borrowing costs are capitalized even when the construction period is less than 12 months.

For general-purpose borrowings, which are partly used for the acquisition, construction, or production of a qualifying asset, the amount of borrowing costs eligible for capitalization during each accounting period is determined based on a capitalization rate applied to the weighted average cumulative expenditures on the qualifying asset. The capitalization rate is based on the weighted average interest rate of the outstanding general borrowings during the period, excluding specific-purpose borrowings.

Capitalization rate of borrowing costs for the period: 0%

12. Accrued Expenses

Expenses for goods and services received during the reporting period but not yet paid are recognized as accrued expenses and included in the cost of goods sold or operating expenses for the current period.

Accrued expenses are recorded in accordance with the matching principle between revenue and incurred expenses.

At settlement, if the actual expenses differ from the accrual, the difference shall be adjusted accordingly.

13. Provisions for Liabilities

Provisions for liabilities are only recognized when all the following conditions are met:

- The Company has a present obligation (legal or constructive) arising from a past event;
- It is probable that an outflow of economic benefits will be required to settle the obligation; and
- A reliable estimate can be made of the amount of the obligation.

The recognized value of a provision is the best estimate of the amount that will be required to settle the present obligation at the end of the reporting period.

Only costs directly related to the provision initially recognized can be offset by the provision itself.

Provisions are recognized in the period's profit or loss. Any difference between the provision made in the prior period that was not used up and the provision recognized in the current period is reversed and recorded as a reduction in the operating expenses for the period, except for any excess related to provisions for warranties of construction contracts, which is reversed and recognized as other income for the period.

14. Unearned Revenue

Unearned revenue includes amounts received in advance from customers for one or more future accounting periods, such as rent for leased property, interest received in advance for loans, or proceeds from the sale of financial instruments. It also includes other unearned revenue items like the difference between the sale price for installment or deferred payment sales compared to the price for immediate payment, or revenue corresponding to the value of goods or services subject to discount or rebates in traditional customer programs.

Unearned revenue is transferred to Revenue from sales and services or Financial income based on the amount recognized in the relevant accounting period.

15. Equity

Owner's equity is recognized based on the actual capital contributed by the owners. The share premium reflects the difference between the par value, direct costs related to the issuance of shares, and the issue price of shares (including in cases of reissuing treasury shares). This can either be a positive premium (if the issue price exceeds the par value and direct costs related to the share issuance) or a negative premium (if the issue price is lower than the par value and direct costs related to the share issuance).

Other equity represents business capital formed from the results of business operations, donations, grants, asset revaluation (if permitted to increase or decrease owner's equity as allowed by law).

Treasury shares refer to shares issued by the company and repurchased by the company. These shares are not canceled and will be reissued within the period specified by securities laws. Treasury shares are recognized at the actual repurchase price and are presented on the Balance Sheet as a reduction in Owner's Equity. The cost of treasury shares when reissued or used to pay dividends, bonuses, etc., is calculated using the weighted average method.

Revaluation surplus is reflected in cases such as: when there is a government decision on asset revaluation, when privatizing state-owned enterprises, and other cases as regulated by law.

Unappropriated retained earnings reflect the business results (profits or losses) after corporate income tax and the distribution or treatment of the company's profits or losses. The distribution of profits is made when the company has unappropriated retained earnings, and such distribution does not exceed the unappropriated retained earnings on the consolidated financial statements, after excluding the impact of profits recorded from bargain purchase transactions. In the case of dividend payments or profit distribution to owners exceeding the unappropriated retained earnings, it is recognized as a reduction of owner's equity. Unappropriated retained earnings may be distributed to investors based on their contribution ratios after being approved by the General Assembly/Board of Directors, and after the company has made appropriate fund allocations in accordance with the company's charter and Vietnamese law.

Dividends payable to shareholders are recognized as liabilities in the company's Balance Sheet after the Board of Directors' dividend declaration and the announcement of the dividend entitlement date by the Vietnam Securities Depository and Clearing Corporation.

16. Revenue

Sales revenue

Sales revenue is recognized when the following conditions are simultaneously met:

- The majority of the risks and benefits associated with ownership of the product or goods have been transferred to the buyer;
- The company no longer holds the control over the goods as the owner or the right to control the goods;
- The revenue is relatively certain to be determined;
- The company has received or will receive the economic benefits from the sales transaction;
- The costs related to the sales transaction can be identified.

Service Revenue

Revenue from the provision of services is recognized when the following conditions are simultaneously met:

- The revenue is relatively certain to be determined;
- There is a likelihood of obtaining economic benefits from the service transaction;
- The portion of work completed as of the balance sheet date can be determined;
- The costs incurred for the transaction and the costs to complete the service provision transaction can be identified.

The portion of the work completed for service provision is determined using the percentage-of-completion method.

Financial Revenue

Revenue arising from interest, royalties, dividends, profits from investments, and other financial revenues is recognized when both of the following conditions are met:

- There is a likelihood of obtaining economic benefits from the transaction;
- The revenue is relatively certain to be determined.

Dividends and profit distributions are recognized when the company has the right to receive the dividends or profit from its investment.

17. Revenue Deductions

Revenue deductions from sales and services provided during the period include: Trade discounts, sales returns and allowances.

Trade discounts, sales allowances and sales returns incurred in the same period as the sale of products, goods, and services will be adjusted to reduce revenue for the period in which they arise. In cases where products, goods, or services were sold in previous periods and deductions arise in subsequent periods, the revenue will be reduced as follows:

- If the deductions occur before the issuance of the financial statements, the reduction will be reflected in the financial statements of the previous period;
- If the deductions occur after the issuance of the financial statements, the reduction will be reflected in the revenue of the period in which they occur.

18. Cost of goods sold (COGS)

Cost of goods sold represents the value of products, goods and services sold during the period.

19. Financial Expenses

Financial expenses include:

- Costs or losses related to financial investment activities;
- Borrowing costs;
- Losses from the sale of short-term securities, costs related to securities transactions;
- Provision for impairment of trading securities, provision for losses on investments in other entities, losses arising from foreign currency sales, exchange rate losses, etc.

These costs are recorded based on the total incurred during the period and are not offset against financial income.

20. Corporate Income Tax

Deferred Tax Assets and Deferred Tax Liabilities

Deferred tax assets are determined based on the total temporary differences that are deductible and the value of tax losses and unused tax incentives carried forward to the next year. Deferred tax liabilities are determined based on deductible temporary differences.

Deferred tax assets and deferred tax liabilities are recognized at the current corporate income tax rate, based on the applicable tax rates and laws effective at the end of the reporting period.

Current Income Tax Expense and Deferred Income Tax Expense

Current income tax expense is determined based on taxable income for the year and the corporate income tax rate for the current year.

Deferred income tax expense is determined based on the amount of deductible temporary differences, taxable temporary differences, and the corporate income tax rate.

Current income tax expense is not offset against deferred income tax expense.

21. Related Parties

A party is considered to be related if it has the ability to control or significantly influence the other party in making decisions about its financial and operational policies. The related parties of the Company include:

- Enterprises directly or indirectly controlling, controlled by, or under common control with the Company, including the parent company, subsidiaries, and affiliates;
- Individuals who, directly or indirectly, have voting power over the Company and can significantly influence the Company, key management personnel of the Company, and close family members of these individuals;
- Enterprises in which the individuals mentioned above directly or indirectly hold a significant portion of the voting power or have significant influence over the enterprise.

Total	248.477.246.334	278.953.414.716

Financial Risk Management

The Company's financial risks include market risk, credit risk, and liquidity risk. A system of internal controls has been established to maintain a reasonable balance between the costs associated with risks and the costs of managing those risks. The Board of Management is responsible for overseeing the risk management process to ensure that risk and control measures are kept in appropriate balance.

Market risk

The Company's business operations are primarily exposed to risks arising from changes in prices, exchange rates, and

Price risk:

The Company is exposed to equity price risk arising from its short-term and long-term equity investments due to the uncertainty of future market prices. Long-term equity investments are held for strategic purposes, and as at the end of the reporting period, the Company has no plans to dispose of these investments

Exchange rate risk:

The Company is exposed to foreign exchange risk as the fair value of future cash flows of financial instruments may fluctuate due to changes in foreign exchange rates, given that the Company's borrowings, revenues, and expenses are denominated in currencies other than the VND.

Interest rate risk:

The Company is exposed to interest rate risk as the fair value of future cash flows of financial instruments may fluctuate due to changes in market interest rates, particularly in relation to its demand and term deposits, borrowings, and floating-rate debt. The Company manages this risk by analyzing market competition in order to secure interest rates that are favorable to its operational objectives.

Credit risk

Credit risk is the risk that a party to a financial instrument or contract will be unable to fulfill its obligations, resulting in a financial loss to the Company. The Company is exposed to credit risk from its operating activities (primarily in relation to trade receivables) and from its financial activities (including bank deposits, loans, and other financial instruments).

Total	458.323.373.795	5.390.459.170	-	463.713.832.965

Liquidity risk

Liquidity risk is the risk that the Company will encounter difficulty in meeting its financial obligations due to a lack of funds. The Company's liquidity risk primarily arises from the mismatches in the maturities of its financial assets and financial liabilities.

The maturity of financial liabilities based on contractually expected payments (based on cash flows of principal) is as follows:

	Unit: VND			
	1 year or less	Over 1 year to 5	Over 5 yeas	Total
	VND	years	VND	VND
		VND		
Closing				
Loans and Debts	49.678.061.635	-		49.678.061.635
Trade payables, other payables	194.371.153.769	100.000.000		194.471.153.769
Accrued expenses	4.328.030.930	-		4.328.030.930
Total	248.377.246.334	100.000.000	-	248.477.246.334
Opening				
Loans and Debts	66.288.460.443	-		66.288.460.443
Trade payables, other payables	207.797.827.018	100.000.000		207.897.827.018
Accrued expenses	4.767.127.255	-		4.767.127.255
Total	278.853.414.716	100.000.000	-	278.953.414.716

The Company believes that the concentration of risk with respect to debt servicing is manageable. The Company is able to service its debts as they fall due from cash flows from operations and proceeds from maturing financial assets.

2. COMPARATIVE DATA

HAIDUONG PUMP
MANUFACTURING JSC

No: 431/ CV-HAPUMA

THE SOCIALIST REPUBLIC OF VIETNAM
Independence – Freedom - Happiness

Hai Duong, July 18th, 2025

To: *The State Securities Commission;
Hanoi Stock Exchange*

Hai Duong Pump Manufacturing Joint stock company is a listed company on Hanoi Stock Exchange with the stock code CTB.

The Company would like to provide an explanation for the change in profit after corporate income tax presented in the Q2/2025 Financial Statements as follows:

- Profit after corporate income tax for Q2/2025 was VND 12,000,729,086, representing an increase of 347% compared to the same period in 2024.
- Reason for the increase in profit after corporate income tax: Mainly due to a significant increase in revenue in Q2/2025 compared to Q2/2024, along with a higher profit margin on goods sold during the period compared to the same period in 2024.

Respectfully.

Recipient:

- As above;
