II. Accounting period, currency unit used in accounting

1. Accounting period (term)

The Company's annual accounting period begins on 1st January and ends on 31st December every year. This interim financial report is prepared for the operating period from 01st April 2025 to 30th June 2025.

2. Currency unit used in accounting

The currency unit used in accounting is Vietnam Dong ("VND"), accounting on the principle of historical cost, in compliance with Accounting Standards, Vietnamese corporate accounting regime and applicable legal regulations relating to the preparation and presentation of interim financial statements.

III. Applicable accounting standards and regimes

1. Applicable accounting regime

The Company applies the Enterprise Accounting Regime issued under Circular No. 200/2014/TT-BTC dated 22nd December 2014 by Ministry of Finance guiding the Enterprise Accounting Regime and Circular No. 53/2016/TT -BTC dated 21st March 2016 by Ministry of Finance amending and supplementing several articles of Circular No. 200/2014/TT-BTC.

2. Statement on the compliance with Accounting Standards and Accounting Regime

The Company's interim financial statements are prepared and presented in accordance with Vietnamese Accounting Standards, the current Vietnamese Accounting Regime and relevant legal regulations.

IV. Applicable accounting policies

1. Exchange rates applied in accounting

The exchange rate when re-evaluating monetary items classified as liabilities is the exchange rate announced by the Vietnam Development Bank - Northeast Regional Branch.

Financial assets: At the initial recognition date, financial assets are recorded at cost plus transaction costs directly related to the purchase of that financial asset. The Company's financial assets include cash, cash equivalents, customer receivables, other receivables and financial investments.

Financial debt: At the initial recognition date, financial debt is recorded at cost plus transaction costs directly related to the issuance of that financial debt. The Company's financial liabilities include payables to sellers, other payables, payable expenses, financial lease debts, and loans.

Re-valuation after initial recognition

Currently, there are no regulations on re-evaluation of financial instruments after initial recognition.

3. Principles for determining amounts

Money is a general indicator reflecting all available money of the Enterprise at the time of reporting, including cash in the Enterprise's fund and demand deposits in banks, recorded and reported in Vietnam Dong (VND), in accordance with the provisions of Accounting Law No. 88/2015/QH13 dated 20th November 2015.

Liabilities receivable are kept track in detail according to each object and each term of receivables as well as other factors according to the management needs of the Company.

4. Principles of accounts receivable accounting

Receivables are amounts that must be recovered from customers and other entities. Receivables include accounts receivable from customers and other receivables. Receivables are presented at book value subtracting provisions for doubtful debts. Accounts receivable must not be recorded higher than the value to be recovered.

Customer receivables include commercial receivables arising from purchase and sale transactions.

Other receivables include receivables of a non-commercial nature, not relating to purchase and sale transactions.

Receivables are kept track in detail according to each object and term of receivables and other factors according to the management needs of the Enterprise.

5. Principles for recording inventory

Inventories are determined on the basis of the lower of cost and net realizable value. The cost of inventory includes the cost of direct materials, direct labor and manufacturing overhead, if any, to bring the inventory to its present location and condition. The original cost of inventory is determined according to the weighted average method. Net realizable value is determined by the estimated selling price subtracting estimated costs to complete the products and incurred marketing, sales and distribution costs.

Inventory accounting method: The company applies the regular declaration method.

6. Principles of accounting and depreciation of fixed assets

6.1 Recording principles and depreciation methods for tangible fixed assets

Tangible fixed assets are recorded at their original cost, reflected on the Balance Sheet according to the criteria of original price, accumulated depreciation and remaining value.

The recognition and depreciation of tangible fixed assets are performed in accordance with Vietnam Accounting Standard No. 03- Tangible Fixed Assets, Circular No. 200/2014/TT-BTC dated 22nd December 2014 of the Ministry of Finance guiding the corporate accounting regime, Circular 45/2013/TT-BTC dated 25th April 2013 guiding the management, use and depreciation of fixed assets, Circular No. 147/2016/TT-BTC dated 13th October 2016 on amending and supplementing some articles of Circular No. 45/2013/TT-BTC and Circular No. 28/2017/ TT-BTC dated 12th April 2017 amending and supplementing several articles of Circular No. 45/2013/TT-BTC and Circular No. No. 147/2016/TT-BTC dated 13th October 2016.

The original cost of fixed assets formed by purchase includes the purchase price and all other costs directly related to making the asset ready-to-use. For fixed assets formed by capital construction investment with contracting method or self-construction and production method, the original price is the final settlement price of the construction project according to the current Investment and Construction Management Regulations, other directly related costs and registration fees (if any). In case the project has been completed and put into operation but the

final settlement has not been approved, the historical cost of the fixed assets is recorded at the provisional price based on the actual costs spent to acquire the fixed assets. The provisionally calculated original price will be adjusted according to the final price approved by the competent authorities.

The fixed assets that the Company receives from the Project Management Board are recorded and depreciated when the decision to approve the final settlement is available and the source of the fixed assets is determined, not subject to the time of completion. handover and put the assets into use.

The company applies the straight-line depreciation method for tangible fixed assets. Accounting for tangible fixed assets is classified into groups of assets with the same nature and purpose of use in the Company's production and business activities, including:

Type of fixes asset	Depreciation time (year)
- Houses, architectural objects	10 - 50
- Machinery and equipment	06 - 12
- Transportation vehicles, transmission devices	08 - 30
- Managerial equipment and tools	04 - 08
- Other tangible fixed assets	04 - 12

6.2 Principles of recognition and methods of depreciation of intangible fixed assets

The recognition and depreciation of intangible fixed assets are carried out in accordance with Vietnam Accounting Standard No. 04- Intangible Fixed Assets, Circular No.200/2014/TT-BTC dated 22nd December 2014 of by Ministry of Finance guiding the corporate accounting regime; Circular 45/2013/TT - BTC dated 25th April 2013 guiding the management, use and depreciation of fixed assets, Circular No. 147/2016/TT-BTC dated 13th October 2016 on amending and supplementing several articles of Circular No. 45/2013/TT-BTC and Circular No. 28/2017/ TT-BTC dated 12th April 2017 amending some articles of Circular No. 45/2013/TT-BTC and Circular No. No. 147/2016/TT-BTC dated 13th October 2016.

Intangible fixed assets are recorded at their original cost, reflected on the Balance Sheet according to the criteria of original price, accumulated depreciation and remaining value.

The company applies the straight-line depreciation method for intangible fixed assets. Accounting for intangible fixed assets is classified into groups of assets with the same feature and purpose of use in the Company's production and business operation, including:

Type of fixes asset	Depreciation time (year)
- Software	05

7. Principles for recognizing construction in progress costs

The Company's construction in progress costs are investment costs for construction of water supply systems, costs for installing pipelines, pumping stations... recorded at historical cost. This cost includes necessary costs to form assets including construction costs, equipment, other costs and related interest costs in accordance with the Company's accounting policies. These costs will be converted to the historical cost of fixed assets according to the provisional price (if no approved settlement is available) when the assets are handed over and put into operation. According to the State's regulations on investment and construction management, subject to management decentralization, the settlement value of completed basic construction works

needs to be approved by the competent authorities. Therefore, the final value of the value of capital construction works may be changed and subject to the settlement approved by the competent authorities.

8. Principles for recognizing and allocating long-term prepaid expenses

Prepaid expenses include actual expenses that have been incurred but are related to the results of production and business activities of many accounting periods. Prepaid expenses include tools and supplies used and awaiting allocation and fixed asset repair costs. Prepaid expenses are allocated to expenses using the straight-line method over a period not exceeding 3 years.

9. Principles of accounting for liabilities

Liabilities include payments to suppliers and other payables. Liabilities include accounts payable to suppliers and other payables. Liabilities are not recorded as lower than payment obligations.

Payables to sellers include trade payables arising from purchases of goods, services, assets and the seller must be an independent unit to the buyer.

Other payables include non-commercial payables, not related to transactions of purchasing or providing goods and services.

Liabilities are kept track in detail by each subject and payment term.

10. Principles for recognizing loans

The Company's loans include loans from Vietnam Development Bank- Northeast Regional Development Branch, Vietnam Joint Stock Commercial Bank for Industry and Trade - Hai Duong Branch, and Joint Stock Commercial Bank for Investment and Development of Vietnam- Hai Duong Branch, recorded on the basis of receipts, bank documents, agreements and loan contracts, loan agreements.

The Company has re-evaluated foreign currency loans at the time of preparing the Financial Statements using the exchange rate announced by the Vietnam Development Bank - Northeast Regional Branch.

11. Principles for recognizing payable expenses

Payable expenses are interest expenses payable, which are determined basing on the loan contract, loan agreement and actual loan period.

The accrual of production and business expenses in the period is calculated strictly and there is reasonable and reliable evidence of the expenses that must be accrued in the period, to ensure that the amount of expenses to be accounted for in this account matches the actual expenses incurred.

12. Principles for recognizing and capitalizing borrowing costs

Borrowing costs are recorded in production and business expenses in the year when incurred, unless capitalized in accordance with the provisions of Accounting Standards "Borrowing costs". Accordingly, borrowing costs are directly related to the purchase, construction investment or production of assets that take a relatively long time to complete and put into use or business are added to the historical cost of the asset until the assets are put into use or business.

13. Principles for recognizing Owner's equity

The Company Owner's contributed capital is recorded according to the actual amount contributed by the Owner.

Undistributed after-tax profits are the profits from the production and business activities of the Enterprise after deducting this year's corporate income tax expenses.

14. Principles and methods of recognizing revenue and other income

The Company's revenue includes revenue from safe water supply, revenue from pipeline installation, other revenue and revenue from bank deposit interest.

Revenue from supply of safe water

Revenue from safe water supply is recognized when the following conditions are simultaneously satisfied:

- + The Company has transferred most of the risks and benefits associated with ownership of products or goods to the buyer.
- + The company no longer holds the right to manage the goods as the owner of the goods or the right to control the goods.
- + Revenue is determined to be relatively reliable. When the contract stipulates that the buyer has the right to return the purchased products or goods under specific conditions, revenue is only recognized when those specific conditions no longer exist and the buyer is not entitled to return products and goods (except in cases where customers have the right to return goods in the form of exchange for other goods or services).
- + The company has obtained or will receive economic benefits from the sales transaction.
- + Identify costs related to sales transactions.

Revenue from installation of pipelines

When the results of contract performance are reliably estimated:

- + For construction contracts stipulating that the contractor is paid according to the planned progress, revenues and costs related to the contract are recognized corresponding to the completed work as determined by the Company on its own on the date ending the fiscal year.
- + For construction contracts stipulating that the contractor is paid according to the value of the work volume performed, revenues and costs related to the contract are recognized corresponding to the completed work confirmed by the customer and reflected on the issued invoice.
- + Increases and decreases in construction volume, compensation revenues and other revenues are only recognized as revenue when agreed by customers.

- + When the results of performance of a construction contract cannot be reliably estimated:

Revenue is only recognized equivalent to the contract costs incurred whose repayment is relatively certain.

Contract costs are only recognized when the costs have been actually incurred.

The difference between the total accumulated revenue of the recorded construction contract and the accumulated amount recognized on the payment invoice according to the planned progress of the contract is recorded as a receivables or payables according to the planned progress of the construction contract.

Revenue from interest on bank deposits: It is recognized on the basis of time and actual interest rate of each term, in compliance with 2 conditions for recording revenue arising from interest, royalties, distributed dividends and profits according to Vietnam Accounting Standard No. 14 - "Revenue and other Income".

Amounts advanced by customers are not recognized as revenue during the period.

Other sources of income and revenues of the Company are recorded on the basis of receipts, bank documents and other relevant accounting documents.

15. Principles for recording cost of goods sold

Cost of goods sold is recorded and grouped according to the value and quantity of finished products, goods, and materials sold to customers, in accordance with the revenue recognized in the period.

The original costs of the pipeline installation business is determined on the basis of the estimate of each project, suitable with actual costs incurred and revenue recorded in the period.

16. Principles of financial cost accounting

Financial expenses include loan interest expenses and exchange rate difference losses from re-evaluation of loans in foreign currency, recorded in the Interim Business Operation Result Statement (Interim Income Statement), not offset against financial revenue.

16. Principles of financial cost accounting

Financial expenses include the loan interest expenses and the exchange rate difference losses recorded in the Interim Income Statement, not offset against financial operating revenue.

17. Other accounting principles and methods

Tax obligations

Value Added Tax (VAT)

The Company applies VAT declaration and calculation according to the guidance of the current tax law.

Corporate income (revenue) tax

Corporate income tax represents the total value of the current tax payable. The current tax payable is calculated on the basis of the taxable income during the year. Taxable income differs from the net profit presented in the Income Statement (Business Operation Result Statement) because taxable income does not include income or expenses that are taxable or deductible in other years (including the carried loss, if any) and does not include non-taxable or non-deductible items.

The company applies a corporate income tax rate of 20% on its taxable profits.

The determination of the Company's corporate income tax is based on current tax regulations. However, these regulations change from time to time and the final determination of corporate income tax depends on the inspection results of the competent tax authority.

Other kinds of tax

Other types of tax and fee are declared and paid by the Company to the local tax authorities in accordance with the current regulations of the Government.
