4. Business structure

The company has headquarters and affiliated units as follows:

Company Office

Anti-loss Construction Enterprise

Water Supply Service Enterprise in Vinh City

Water Production Enterprise in Vinh City

Water Supply Station in Anh Son

Water Supply Station in Con Cuong

Water Supply Station in Do Luong

Water Supply Station in Nam Dan

Water Supply Station in Quy Chau

Water Supply Station in Quy Hop

Water Supply Station in Thanh Chuong

Water Supply Station in Tan Ky

Water Supply Station in Ky Son

Water Supply Station in Tuong Duong

II. Accounting period, currency used in accounting

1. The Company's annual accounting period begins on January 1 and ends on December 31 of each year.

2. Currency used in accounting: Vietnamese Dong..

III. Applicable Accounting Standards and Regimes**1. Applicable accounting regime**

The Company applies the Enterprise Accounting Regime issued by the Ministry of Finance under Circular No. 200/2014/TT-BTC dated on December 22, 2014 and Circular No. 53/2016/TT-BTC dated on March 21, 2016 of the Ministry of Finance on amending and supplementing a number of articles of Circular No. 200/2014/TT-BTC.

2. Declaration on compliance with Accounting Standards and Accounting Regime

The financial statements are prepared and presented in Vietnamese Dong (VND), using the historical cost principle and in accordance with Vietnamese Accounting Standards, Vietnamese Enterprise Accounting System and relevant current regulations in Vietnam.

The financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries other than Vietnam.

IV. Applicable accounting policies

1. Principles of recording cash and cash equivalents.

Cash and cash equivalents include cash on hand, bank deposits, short-term investments or highly liquid investments. Highly liquid investments are those that can be converted into known amounts of cash within 03 months and are subject to insignificant risk of changes in value.

2. Principles of accounting for receivables

Accounts receivable include: customer receivables and other receivables at the reporting date.

(i) Receivables from customers include commercial receivables arising from purchase-sale transactions, such as: Receivables from sales, provision of services, liquidation, transfer of assets (fixed assets, investment real estate, financial investments) between the enterprise and the buyer (an entity independent of the seller, including receivables between the parent company and subsidiaries, joint ventures, and associates). These receivables include receivables from export sales of the entrusting party through the entrusting party;

(ii) Other receivables include non-commercial receivables not related to purchase and sale transactions, such as: Receivables generating financial revenue, such as: receivables from loan interest, deposits, dividends and shared profits; Amounts paid on behalf of third parties with the right to receive back; Amounts that the export trustee must collect on behalf of the trustor; Non-commercial receivables such as asset lending, receivables from fines, compensation, assets in short supply awaiting resolution, etc.

Receivables are monitored in detail by receivable term, receivable entity, original currency and other factors according to the Company's management needs. Receivables are classified as short-term or long-term based on the remaining term.

Receivables are presented at book value minus provisions for doubtful debts. Provision for doubtful debts (if any) is set aside by the Company for overdue receivables stated in economic contracts, contract commitments or debt commitments, which the enterprise has requested many times but has not yet recovered. The determination of the overdue period of the receivable is determined based on the principal repayment period according to the original purchase and sale contract, not taking into account debt extensions between the parties, in which:

Overdue receivables	Provision level
From over 6 months to under 1 year	30% of value
From 1 year to less than 2 years	50% of value
From 2 years to under 3 years	70% of value
From 3 years or more	100% value

Provision for doubtful debts is also made based on the expected loss of recovery. Receivables that are not due for payment but the debtor has gone bankrupt or is in the process of dissolution, missing, absconding and will be refunded when the debt is recovered.

Increases or decreases in the reserve account balance are recorded as business management expenses during the year.

3. Principles of inventory recording:

Inventories are stated at the lower of cost and net realizable value. The cost of inventories comprises all costs incurred in bringing the inventories to their present location and condition, including: purchase price, non-refundable taxes, transportation, handling, storage costs incurred in the purchase process, normal loss, and other costs directly attributable to the purchase of inventories. The Company applies the perpetual inventory method to record inventories. The Company applies the weighted average method to calculate the cost of inventories.

The Company's provision for inventory impairment (if any) is made when there is reliable evidence of a decline in the net realizable value compared to the original cost of the inventory. Net realizable value is determined by the estimated selling price less the estimated costs of completion and costs to be incurred in marketing, selling and distribution. Increases or decreases in the provision for inventory impairment are recorded in the cost of goods sold during the year.

4. Principles of recording and depreciation of fixed assets, financial lease fixed assets, investment real estate:

4.1. Tangible fixed assets

Tangible assets are recorded as tangible fixed assets if they simultaneously satisfy the following criteria: (i) It is certain that future economic benefits will be obtained from the use of the asset; (ii) The usage period is over 1 year; (iii) The original cost of the asset must be reliably determined and has a value of VND 30,000,000 or more.

Tangible fixed assets are stated at cost less accumulated depreciation.

Historical cost

Historical cost of a purchased tangible fixed asset comprises the purchase price and any other costs directly attributable to bringing the asset to working condition for its intended use.

The Historical cost of self-made or self-constructed tangible fixed assets includes construction costs, actual production costs incurred plus installation and testing costs.

Expenditures incurred after the initial recognition of tangible fixed assets are recorded as an increase in the original cost of the asset if it is certain that these costs will increase the future economic benefits from the use of that asset. Expenditures incurred that do not satisfy the above conditions are recorded as production and business expenses in the year.

Depreciation

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives, as follows:

- Houses and structures

05-30 years

- Machinery and equipment	10-20 years
- Means of transport, transmission	06-10 years
- Equipment, management tools	03-10 years
- Other assets	10-20 years

4.2. Intangible fixed assets

Any actual expenses that an enterprise has spent that simultaneously satisfy the following criteria without forming tangible fixed assets are considered intangible fixed assets: (i) It is certain to obtain future economic benefits from the use of that asset; (ii) It has a usage period of 1 year or more; (iii) The original cost of the asset must be reliably determined and has a value of VND 30,000,000 or more.

Intangible fixed assets are stated at cost less accumulated depreciation.

Historical cost

The historical cost of separately acquired intangible fixed assets comprises its purchase price and any directly attributable costs of bringing the asset to its intended use.

Expenses related to intangible fixed assets arising after initial recognition must be recorded as production and business expenses in the period, unless they simultaneously satisfy the following two conditions, then they are included in the original cost of intangible fixed assets: (i) These expenses are capable of making the intangible fixed asset generate more economic benefits in the future than the initially assessed level of operation; (ii) The expenses are assessed with certainty and are associated with a specific intangible fixed asset.

Depreciation

Intangible fixed assets are depreciated using the straight-line method over their estimated useful lives, as follows:

- Computer software	04 years
- Long-term land use rights without depreciation	

5. Principles of accounting for prepaid expenses.

Prepaid expenses include short-term or long-term prepaid expenses on the balance sheet and are amortized over the period for which the expenses are paid or the economic benefits generated from them.

6. Principles of accounting for liabilities.

Payables are tracked in detail by payment term, payable entity, original currency and other factors according to the management needs of the enterprise.

The classification of payables as trade payables and other payables is made according to the following principles:

(i) Payables to sellers include commercial payables arising from transactions of purchasing goods, services, assets and sellers (who are independent entities from the buyer, including payables between parent companies and subsidiaries, joint ventures, and associates). These payables include payables when importing through a consignee (in consignment import transactions);

(ii) Other payables include non-commercial payables not related to the purchase, sale, or provision of goods and services: Payables related to financial expenses, such as: payables for interest, dividends and profits, payable financial investment operating expenses; Payables paid by third parties; Amounts received by the trustee from related parties for payment according to regulations in import-export trust transactions; Non-commercial payables such as payables for borrowing assets, payables for fines, compensation, surplus assets awaiting disposal, payables for social insurance, health insurance, unemployment insurance, union fees, etc.

When preparing financial statements, accountants base on the remaining term of payables to classify them as long-term or short-term.

7. Loans and financial lease liabilities.

Loans and financial lease liabilities are monitored by each lending entity, each debt agreement, each type of debt asset and the repayment period of the loans and financial lease liabilities. Loans with a repayment period of more than 12 months from the date of the Financial Statement are presented as long-term loans and financial lease liabilities.

Amounts due for payment within 12 months from the date of the Financial Statements are presented as short-term loans and finance lease liabilities.

8. Borrowing costs.

Borrowing costs directly attributable to the acquisition, construction or production of qualifying assets that necessarily take a substantial period of time to get ready for their intended use or sale are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Income earned on temporary investments from borrowings is deducted from the cost of those assets.

All other interest expenses are recorded in the Company's income statement for the year.

9. Costs payable.

Payable expenses arising from the purchase of goods and services received from the seller but not actually paid due to lack of invoices or insufficient accounting records and documents, are recorded in the production and business expenses of the reporting period.

Payable expenses include amounts payable to employees during the period such as advance provision for interest expenses payable in case of loans with interest paid in arrears, bond interest paid after the bond matures; advance provision for expenses to temporarily calculate the cost of goods and finished real estate products sold.

10. Equity:

Owner's equity is recorded at the actual capital contributed by the owner.

Retained earnings is the profit from the Company's operations after deducting adjustments due to retrospective application of changes in accounting policies and retrospective adjustment of material errors of previous years.

11. Revenue:

Revenue is recognized when it is probable that the economic benefits will flow to the Company and the revenue can be reliably measured. Revenue is measured at the fair value of the consideration received or receivable, net of trade discounts, volume rebates and sales returns.

- Sales revenue;

Revenue from sales is recognized when all of the following conditions are met: (i) The Company has transferred to the buyer the significant risks and rewards of ownership of the goods; (ii) The Company no longer retains ownership or control over the goods; (iii) The amount of revenue can be measured reliably; (iv) The Company has or will receive economic benefits from the transaction; and (v) The costs incurred or to be incurred in respect of the transaction can be measured reliably.

-Service revenue;

Revenue from a transaction involving the rendering of services is recognised when the outcome of the transaction can be measured reliably. The outcome of a transaction involving the rendering of services is recognised when all of the following conditions are met: (i) The amount of revenue can be measured reliably; (ii) It is probable that the economic benefits associated with the transaction will flow to the Company; (iii) The stage of completion of the transaction at the balance sheet date can be measured reliably; and (iv) The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

- Financial revenue;

Revenue arising from interest, royalties, dividends and profits distributed by the Company is recognized when all of the following conditions are satisfied: (i) It is probable that the economic benefits from the transaction will flow to the Company; and (ii) The revenue can be measured reliably.

- Other income

Other income includes income outside the production and business activities of the enterprise. Such as: Income from the sale and liquidation of fixed assets; Collection of fines due to customers violating contracts; Collection of compensation from third parties to compensate for lost assets; Collection of bad debts that have been written off; Collection of debts payable with unidentified owners; Income from gifts, gifts in cash, in kind from organizations and individuals given to the enterprise...

12. Cost

Costs are amounts that reduce economic benefits, recorded at the time the transaction occurs or when there is a relatively certain possibility that they will arise in the future, regardless of whether money has been spent or not.

The recognition of expenses even when they have not yet reached the payment deadline but are likely to arise is to ensure the principle of prudence and capital preservation. Expenses and the revenue they generate must be recorded simultaneously according to the matching principle. However, in some cases, the matching principle may conflict with the prudence principle in accounting, then accountants base on the nature and Accounting Standards to reflect the transaction honestly and reasonably.

Expenses that are not considered as corporate income tax expenses according to the provisions of the Tax Law but have full invoices and vouchers and have been accounted for correctly according to the Accounting Regime shall not be recorded as a reduction in accounting expenses but only adjusted in the corporate income tax settlement to increase the amount of corporate income tax payable.

13. Taxes

Current corporate income tax

The tax currently payable is based on taxable profit for the year. Taxable profit differs from net profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years (including losses carried forward, if any) and it further excludes items that are not taxable or deductible.

The determination of the Company's income tax is based on current tax regulations. However, these regulations are subject to change from time to time and the final determination of corporate income tax depends on the results of the examination by the competent tax authority.

Other taxes

Other taxes are applied according to current tax laws in Vietnam.

VI. Additional information for items presented in the Accounting balance sheet

	Unit: VND	
	End of the period	Begin of the year
1. Cash		
Cash	1.005.676.120	229.034.226
Non-term bank deposits	36.255.620.972	94.765.397.413
Bank deposits with terms of less than 3 months	162.136.190.976	42.106.543.849
Money is being transferred
