The main activity of the Company is construction of industrial and civil works.

Normal business and production cycle

Due to the nature of the Company's operations, which are mainly in the construction and installation sector, the Company does not have a fixed production and business cycle but depends on each contract and project that the Company implements.

Explanation of comparability of information in financial statements

As stated in Note 3, from 01 January 2015, the Company has applied Circular No. 200/2014/TT-BTC issued by the Ministry of Finance on 22 December 2014 ("Circular 200"), guiding the accounting regime for enterprises. This Circular is effective for fiscal years beginning on or after 01 January 2015. Circular 200 replaces the provisions on the accounting regime for enterprises issued under Decision No. 15/2006/QĐ-BTC dated 20 March 2006 of the Ministry of Finance and Circular No. 244/2009/TT-BTC dated 31 December 2009 of the Ministry of Finance. However, the application of Circular 200 does not have a material impact on the comparability of the figures in the financial statements.

II. Accounting period and accounting currency

Currency: The accompanying financial statements are presented in Vietnamese Dong (VND), using the historical cost principle and in accordance with Vietnamese accounting standards, corporate accounting regimes and legal regulations related to the preparation and presentation of financial statements.

The accompanying financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries other than Vietnam.

Accounting period

Annual accounting period commences from 01 January and ends as at 31 December.

The 2nd quarter 2025 financial report is prepared for the accounting period from April 1, 2025 to July 30, 2025.

III. Chuẩn mực và chế độ kế toán áp dụng

Applicable Accounting Policies: On December 22, 2014, the Ministry of Finance issued Circular No. 200/2014/TT-BTC ("Circular 200") providing guidance on the accounting regime for enterprises. This Circular is effective for fiscal years beginning on or after January 1, 2015. Circular 200 replaces the provisions on the accounting regime for enterprises issued under Decision No. 15/2006/QĐ-BTC dated March 20, 2006 of the Ministry of Finance and Circular No. 244/2009/TT-BTC dated December 31, 2009 of the Ministry of Finance. The Board of Directors has applied Circular 200 in preparing and presenting the financial statements for the period from April 1, 2024 to July 30, 2024.

Declaration of compliance with Accounting Standards and Accounting System: The preparation of financial statements in accordance with Vietnamese accounting standards, accounting regimes for enterprises and legal regulations related to the preparation and presentation of financial statements requires the Board of Directors to make estimates and assumptions that affect the reported figures on liabilities, assets and the presentation of contingent liabilities and assets at the date of the financial statements as well as the reported figures on revenues and expenses during the accounting period. Although accounting estimates are made with all the knowledge of the Board of Directors, the actual figures may differ from the estimates and assumptions made.

IV. Applicable Accounting Policies

Financial Instruments

Initial recognition

Financial assets: At initial recognition, financial assets are identified by purchasing price cost plus other expenses directly related to the purchase and issuance of those assets. Financial assets of the Company include cash, cash equivalents, trade receivables, other receivables, lending loans, long-term and short-term investments.

Financial liabilities.: At initial recognition, financial liabilities are determined by issuing price plus other expenses directly related to the issuance of those liabilities. Financial liabilities of the Company include borrowings, trade payables, other payables and accrued expenses

Subsequent measurement after initial recognition

Currently, there are no regulations on revaluation of financial instruments after initial recognition.

Cash and cash equivalents

Cash and cash equivalents include cash on hand, demand deposits, short-term, highly liquid investments that are readily convertible to known amounts of cash and are subject to an insignificant risk of changes in value.

Receivables

Accounts receivable are amounts that are recoverable from customers or other entities. Accounts receivable are presented at book value less allowances for doubtful debts.

Provision for doubtful debts is made for receivables that are overdue for six months or more, or for receivables that are unlikely to be paid by the debtor due to liquidation, bankruptcy or similar difficulties.

Inventories

Inventories are measured at the lower of cost and net realizable value. Cost includes direct materials, direct labor and, if any, overheads that have been incurred in bringing the inventories to their present location and condition. Cost is determined using the weighted average method. Net realizable value is determined as the estimated selling price less the estimated costs of completion and the estimated costs to be incurred in marketing, selling and distribution.

Principles of recognition and depreciation of fixed assets, financial lease fixed assets, investment real estate

Tangible fixed assets are stated at cost less accumulated depreciation.

The initial cost of tangible fixed assets comprises the purchase price and any other costs directly attributable to bringing the assets to working condition for their intended use.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives, as follows:

| | From 01/04/2025 to 30/06/2025 |
|------------------------------------|-------------------------------|
| | Estimated year |
| Buildings, structures | 10 - 12 |
| Machinery, equipment | 3 - 15 |
| Vehicles, Transportation equipment | 4 - 10 |

Gains and losses arising from the liquidation or sale of assets are the difference between the proceeds from the liquidation and the carrying amount of the assets and are recorded in the income statement.

Investment properties

Investment real estate includes land use rights and factories, structures held by the Company for the purpose of earning rental income.

Investment properties held for lease are stated at cost less accumulated depreciation. The cost of a purchased investment property comprises its purchase price and any directly attributable costs such as legal fees, property transfer taxes and other transaction costs. The cost of a self-constructed investment property is the final settlement value of the construction or directly attributable costs of the investment property.

Investment properties held for lease are depreciated using the straight-line method over their estimated useful lives of 25 years.

Construction in progress

Assets under construction for production, rental, administrative purposes or for other purposes are stated at cost. This includes service costs and related interest costs in accordance with the Company's accounting policy. Depreciation of these assets, on the same basis as other assets, commences when the assets are ready for their intended use.

Financial investments

Financial investments are recorded from the date of purchase and are initially measured at cost plus any transaction costs incurred in connection with the purchase of the investments. In subsequent periods, investments are measured at cost less any impairment losses.

Provision for diminution in value of financial investments is made in accordance with current accounting regulations.

Prepaid expenses

Prepaid expenses include actual expenses that have been incurred but are related to the business performance of many accounting periods. Prepaid expenses include the business advantage of land lots contributed by the parent company when equitizing the Company and the value of small tools, equipment and spare parts issued for use, which are considered to be able to bring future economic benefits to the Company for a period of one year or more. The above small tools, equipment and spare parts issued for use are capitalized as long-term prepayments and are allocated to the income statement using the straight-line method over 2 to 3 years in accordance with current accounting regulations.

Accrued expenses

Accrued expenses arise from accounting estimates due to incomplete cost accumulation at the date of acceptance of completed volume. These accrued expenses will ensure that the project is fully costed in the event that parts of the project have been completed but have not yet been settled with subcontractors, suppliers or construction teams. The accrual of project costs is in accordance with current accounting regulations.

Provisions for payables

Provisions are recognised when the Company has a present obligation as a result of a past event, and it is probable that the Company will be required to settle that obligation. Provisions are measured based on management's best estimate of the expenditure required to settle the obligation at the balance sheet date.

Revenue recognition

Sales revenue is recognized when all five (5) following conditions are satisfied:

- (a) The Company has transferred to the buyer the significant risks and rewards of ownership of the products or goods;
- (b) The Company no longer holds the right to manage the goods as the owner of the goods or the right to control the goods;
- (c) The amount of revenue can be measured reliably;
- (d) It is probable that the economic benefits associated with the transaction will flow to the Company; and
- (e) Identify the costs associated with the sales transaction.

Revenue from a transaction involving the rendering of services is recognised when the outcome of the transaction can be measured reliably. Where a transaction involving the rendering of services is spread over several periods, revenue is recognised in each period based on the results of the stage of completion of the work at the balance sheet date of that period. The outcome of a transaction involving the rendering of services is recognised when all four (4) of the following conditions are met:

- (a) The amount of revenue can be measured reliably;
- (b) It is probable that the economic benefits associated with the transaction will flow to the entity;
- (c) The stage of completion of the transaction at the balance sheet date can be measured reliably; and
- (d) The costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Revenue from the Company's construction contracts is recognised in accordance with the Company's accounting policy for construction contracts. Interest on deposits is recognised on an accrual basis, taking into account the outstanding amounts and the applicable interest rate. Interest on investments is recognised when the Company's right to receive the payment is established.

Construction contract

Construction contracts stipulate that contractors are paid according to the value of the performed volume. When the results of the construction contract are reliably determined and confirmed by the customer, revenue and costs related to the contract are recorded corresponding to the completed work confirmed by the customer during the year and reflected on the issued invoices.

When the outcome of a construction contract cannot be estimated reliably, revenue is recognised only to the extent of contract costs incurred that are likely to be recoverable.

All interest expenses are recognized in the income statement when incurred.

Tax

Corporate income tax represents the sum of current and deferred tax liabilities.

The tax currently payable is based on taxable profit for the period. Taxable profit differs from net profit as reported in the income statement because it excludes items of income or expense that are taxable or deductible in other years (including losses carried forward, if any) and it further excludes items that are not taxable or deductible.

Deferred income tax is calculated on the differences between the carrying amount and the tax base of assets and liabilities in the financial statements and is recorded under the balance sheet method. Deferred income tax liabilities should be recognized for all temporary differences while deferred income tax assets are recognized only when it is probable that future taxable profits will be available against which the temporary differences can be used.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the asset is realised or the liability is settled. Deferred tax is recognised in the income statement and is denominated in equity except when it relates to items charged or credited directly to equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same taxation authority and the Company intends to settle its current tax assets and liabilities on a net basis.

The determination of the Company's income tax is based on current tax regulations. However, these regulations are subject to change from time to time and the final determination of corporate income tax depends on the results of the examination by the competent tax authority.

Other taxes are applied according to current tax laws in Vietnam.

Re: Explanation of the difference in profit after tax
Q2/2025 compared to Q2/2024

To: - State Securities Commission
- Hanoi Stock Exchange

Based on Circular No.96/2020/TT-BTC dated November 16, 2020, of the Ministry of Finance guiding the disclosure of information on the securities market.

Petrovietnam Industrial and Civil Construction Joint Stock Company (hereinafter referred to as "the Company") would like to provide the following explanations:

The business performance of Petrovietnam Industrial and Civil Construction Joint Stock Company in Q2/2025 compared to Q2/2024 is reflected through the following key indicators:

1. Explanation of the difference in profit after tax exceeding 10%:

* Total revenue and income in Q2/2025 compared to Q2/2024 decreased by VND 358,918,548, equivalent to a 14,53% decrease, specifically as follows:

- Revenue from construction and asset leasing increased by VND 569,646,789, equivalent to a 71,34% increase, due to the Company leasing more assets, machinery, and equipment in Q2/2025 compared to Q2/2024.

- Revenue from financial activities decreased by VND 48,902,451, equivalent to an 8,79% decrease, due to lower deposit interest rates in 2025 compared to 2024.

- Other income decreased by VND 879,662,886, equivalent to a 78,88% decrease, due to the proceeds from the liquidation of fixed assets in Q2/2024 amounting to VND 727,272,727 and the reduction of certain customer payables.

* Total expenses in Q2/2025 compared to Q2/2024 decreased by VND 748,829,190, equivalent to a 21,70% decrease, specifically as follows:

- Cost of goods sold decreased by VND 593,184,935, equivalent to a 54,20% decrease, as there were only costs for asset leasing, with very minimal construction costs compared to 2024.

- Enterprise management expenses increased by VND 95,864,893, equivalent to a 4,93% increase, due to the recognition of tax, fee, and other related expenses in 2025.

- Other expenses decreased by VND 255,439,286, equivalent to a 61,62% decrease, as the Company paid taxes and land rent in the first half of 2025, resulting in lower penalties for late payments compared to Q2/2024.

* Profit after corporate income tax in Q2/2025 compared to Q2/2024 showed a difference exceeding 10%: The main reason is the increase in revenue, significant reduction in cost of goods sold, and a substantial decrease in other expenses as mentioned above. As a result, the loss after corporate income tax in Q2/2025 compared to Q2/2024 decreased by VND 389,910,642, equivalent to 39,76%.

2. Explanation of the loss after tax in Q2/2025:

In Q2/2025, the Company had no new projects and mainly focused on leasing assets, machinery, and equipment. However, high enterprise management expenses led to a loss in business performance.

The above is the explanation of Petrovietnam Industrial and Civil Construction Joint Stock Company. We respectfully submit this to the State Securities Commission, the Hanoi Stock Exchange, and investors for their information.

Sincerely,

Recipients:

- As above;
- Board of Directors, Supervisory Board (e-copy);
- Archived at Administration Department, Finance and Accounting Department (Inh. 3).
