2. ACCOUNTING CONVENTION

Accounting convention

The accompanying separate financial statements, expressed in Vietnam Dong (VND), are prepared under the historical cost convention and in accordance with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to financial reporting.

The accompanying interim separate financial statements are not intended to present the financial position, results of operations and cash flows in accordance with accounting principles and practices generally accepted in countries and jurisdictions other than Vietnam.

Financial year

The Company's financial year begins on 01 January and ends on 31 December.

3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The significant accounting policies, which have been adopted by the Company in the preparation of these separate financial statements, are as follows:

Estimates

The preparation of the interim separate financial statement in conformity with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to financial reporting requires the Board of Management to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities at the date of the interim separate financial statements and the reported amounts of revenues and expenses during the financial year. Although these accounting estimates are based on the Board of Management's best knowledge, actual results may differ from those estimates.

Financial instruments

Initial recognition

Financial assets

At the date of initial recognition, financial assets are recognized at cost plus transaction costs that are directly attributable to the acquisition of the financial assets.

Financial assets of the Company comprise cash, cash equivalents, trade receivables, other receivables and financial investments (excluding investments in subsidiaries).

Financial liabilities

At the date of initial recognition, financial liabilities are recognized at cost plus transaction costs that are directly attributable to the issue of the financial liabilities.

Financial liabilities of the Company comprise trade payables, other payables and accrued expenses.

Subsequent measurement after initial recognition

Currently, there are no requirements for the subsequent measurement of the financial instruments after initial recognition.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand, demand deposits and short-term, highly liquid investments that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

Financial investments

a. Trading securities

Trading securities are those the Company holds for trading purpose. Trading securities are recognised from the date the Company obtains the ownership of those securities and initially measured at the fair value of payments made at the transaction date plus directly attributable transaction costs.

In subsequent years, investments in trading securities are measured at cost less provision for impairment of such investments.

Provision for impairment of investments in trading securities is made when there has been evidenced that their market prices are lower than their costs in accordance with prevailing accounting regulations.

b. Held-to-maturity investments

Held-to-maturity investments comprise investments that the Company has the positive intent or ability to hold to maturity, including term deposits at bank and certificates of deposit.

Held-to-maturity investments are recognised on a trade date basis and are initially measured at acquisition price plus directly attributable transaction costs. Post-acquisition interest income from held-to-maturity investments is recognised in the interim income statement on an accrual basis. Pre-acquisition interest is deducted from the cost of such investments at the acquisition date.

Held-to-maturity investments are measured at cost less provision for doubtful debts.

Provision for doubtful debts relating to held-to-maturity investments is made in accordance with prevailing accounting regulations.

c. Investments in subsidiaries

Investments in subsidiaries

A subsidiary is an entity over which the Company has control. Control is achieved where the Company has the power to govern the financial and operating policies of an investee enterprise so as to obtain benefits from its activities.

Investment in PVI Opportunity Investment Fund ("POF") and PVI Infrastructure Investment Fund ("PIF")

Investment in POF and PIF is measured at historical cost. Any income arising from this investment is recognised in the separate income statement based on the interest announcement from the Board of Fund Representative at the year-end date.

Interests in subsidiaries are initially recognised at cost. The Company's share of the accumulated net profit of the investee after acquisition is recognised in the separate income statement. Distributions received other than such profit share are deducted from the cost of the investments as recoverable amounts.

Investments in subsidiaries are carried in the separate balance sheet at cost less provision for impairment of such investments (if any). Provisions for impairment of investments in subsidiaries are made when there is reliable evidence for declining in value of these investments at the separate balance sheet date.

Provision for investment in POF and PIF is made when the capital contribution is higher than POF's fair value and PIF's fair value at the end of the year.

d. Equity investments in other entities

Equity investments in other entities represent the Company's investments in ordinary shares of the entities over which the Company has no control, joint control, or significant influence.

Equity investments in other entities are carried at cost less provision for impairment.

Receivables

Receivables represent the amounts recoverable from customers or other debtors and are stated at book value less provision for doubtful debts.

Provision for doubtful debts is made for receivables that are overdue for six months or more, or when the debtor is in dissolution, in bankruptcy, or is experiencing similar difficulties and so may be unable to repay the debt.

Tangible fixed assets and depreciation

Tangible fixed assets are stated at cost less accumulated depreciation.

The costs of purchased tangible fixed assets comprise their purchase prices and any directly attributable costs of bringing the assets to their working condition and location for their intended use.

Tangible fixed assets are depreciated using the straight-line method over their estimated useful lives as follows:

	Years
Buildings, structures	25 - 40
Motor vehicles	6
Office equipment	3 - 10
Others	3 - 6

Intangible assets and amortisation

Intangible assets are stated at cost less accumulated amortisation. Intangible assets represent accounting software, management software, and copyrights of other software (collectively referred to as "computer software"). Computer software is amortised using the straight-line method over the estimated useful life of 3 years.

Investment properties

Investment properties held to earn rentals include office buildings held by the Company to earn rentals that are stated at cost less accumulated depreciation. The costs of self-constructed investment properties are the finally accounted construction or directly attributable costs of the properties. Investment properties held to earn rentals are depreciated using the straight-line method over their estimated useful lives.

Borrowing costs

Borrowing costs are recognised in the income statement in the year when incurred unless they are capitalised in accordance with Vietnamese Accounting Standard No. 16 "Borrowing costs".

Payable provisions

Payable provisions are recognised when the Company has a present obligation as a result of a past event, and it is probable that the Company will be required to settle that obligation. Provisions are measured at the Board of Management's best estimate of the expenditure required to settle the obligation as at the separate balance sheet date.

Revenue recognition

Revenue of a transaction involving the rendering of services is recognised when the outcome of such transactions can be measured reliably. Where a transaction involving the rendering of services is attributable to several periods, revenue is recognised in each period by reference to the percentage of completion of the transaction at the separate balance sheet date of that period. The outcome of a transaction can be measured reliably when all four (4) following conditions are satisfied:

- (a) the amount of revenue can be measured reliably;
- (b) it is probable that the economic benefits associated with the transaction will flow to the Company;
- (c) the percentage of completion of the transaction at the separate balance sheet date can be measured reliably; and
- (d) the costs incurred for the transaction and the costs to complete the transaction can be measured reliably.

Leases where substantially all the rewards and risks of ownership of assets remain with the leasing company are accounted for as operating leases. Rental income from operating leases is

recognised in the separate income statement on a straight-line basis over the term of the relevant lease.

Interest income is accrued on a time basis, by reference to the principal outstanding and at the applicable interest rate.

Dividend income from investments is recognised when the Company's right to receive payment has been established.

Foreign currencies

Transactions arising in foreign currencies are translated at exchange rates ruling at the transaction date. The balances of monetary items denominated in foreign currencies as at the separate balance sheet date are retranslated at the exchange rates of the commercial bank where the Company usually transacts on the same date. Exchange differences arising from the translation of these accounts are recognised in the separate income statement.

Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the separate income statement because it excludes items of income or expense that are taxable or deductible in other years (including loss carried forward, if any) and it further excludes items that are never taxable or deductible.

Deferred tax is recognized on significant differences between carrying amounts of assets and liabilities in the interim separate financial statements and the corresponding tax bases used in the computation of taxable profit and is accounted for using separate balance sheet liability method. Deferred tax liabilities are generally recognized for all temporary differences and deferred tax assets are recognized to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilized.

Deferred tax is calculated at the tax rates that are expected to apply in the year when the liability is settled or the asset is realized. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same tax authority and the Company intends to settle its current tax assets and liabilities on a net basis.

The determination of the tax currently payable is based on the current interpretation of tax regulations. However, these regulations are subject to periodic variation and their ultimate determination depends on the results of the tax authorities' examinations.

Other taxes are paid in accordance with the prevailing tax laws in Vietnam.

Enterprise funds

All profits are used to pay dividends to shareholders, allocate to bonus and welfare fund, bonus for the management and other funds under the decision-making competence of the General

Shareholders' Meeting. The allocation ratio shall be decided at the General Shareholders' Meeting as per the request of the Board of Directors.
