#### **Disclosure of information comparability in the interim separate financial statements**

Comparative figures of the interim balance sheet and related notes are figures of the audited separate financial statements for the year ended 31 December 2024.

The comparative figures of the interim income statement, the interim cash flow statement and related notes are figures of the reviewed interim separate financial statements for the 6-month period ended 30 June 2024.

## **2. ACCOUNTING CONVENTION AND ACCOUNTING PERIOD**

### **Accounting convention**

The accompanying interim consolidated financial statements, expressed in Vietnam Dong (VND), are prepared under the historical cost convention and in accordance with Vietnamese Accounting Standards, the accounting regime for enterprises, and legal regulations relating to interim consolidated financial reporting.

The accompanying interim consolidated financial statements are not intended to present the consolidated financial position, consolidated financial performance, and consolidated cash flows in accordance with accounting principles and practices generally accepted in countries and jurisdictions other than Vietnam.

### **Accounting period**

The Company's financial year begins on 01 January and ends on 31 December.

These interim consolidated financial statements are prepared for the 6-month period ended 30 June 2025.

**3. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES**

The significant accounting policies, which have been adopted by the Company in the preparation of these interim consolidated financial statements, are as follows:

**Estimates**

The preparation of interim consolidated financial statements in conformity with Vietnamese Accounting Standards, accounting regime for enterprises and legal regulations relating to interim consolidated financial reporting requires The Board of Executive Officers to make estimates and assumptions that affect the reported amounts of assets, liabilities and disclosures of contingent assets and liabilities at the date of the interim consolidated financial statements and the reported amounts of revenues and expenses during the accounting period. Although these accounting estimates are based on The Board of Executive Officers's best knowledge, actual results may differ from those estimates.

**Basis of consolidation of interim financial statements**

The interim consolidated financial statements incorporate the financial statements of the Company and enterprises controlled by the Company (its subsidiaries) for the 6-month period ended 30 June 2025. Control is achieved when the Company has the power to govern the financial and operating policies of investee enterprises to obtain benefits from its activities.

The results of subsidiaries acquired or disposed of during the period are included in the interim consolidated income statement from the effective date of acquisition or up to the effective date of disposal as appropriate.

Where necessary, adjustments are made to the interim financial statements of subsidiaries to bring the accounting policies used in line with those used by the Company.

Intra group transactions and balances are eliminated in full-on consolidation.

Non-controlling interests consist of the amount of those non-controlling interests at the date of the original business consolidation (see below) and the non-controlling interests' share of changes in equity since the date of the consolidation. Losses in subsidiaries are respectively attributed to the non-controlling interests even if this results in the non-controlling interests having a deficit balance.

**Investments in associates**

An associate is an entity over which the Company has significant influence and that is neither a subsidiary nor an interest in joint venture. Significant influence is the power to participate in the financial and operating policy decisions of the investee but not control or joint control over those policies.

The results and assets and liabilities of associates are incorporated in these interim consolidated financial statements using the equity method of accounting. Interests in associates are carried in the interim consolidated balance sheet at cost as adjusted by post-acquisition changes in the Company's share of the net assets of the associate. Losses of an associate in excess of the Company's interest in that associate (which includes any long-term interests that, in substance, form part of the Company's net investment in the associate) are not recognised, unless the Company has an obligation to make payments on behalf of the associate for debts that the Company has guaranteed and committed to pay. If the associate subsequently makes a profit, the Company shall only recognise its share of that profit after it has offset the previously unrecognised net loss.

Where a group entity transacts with an associate of the Company, unrealised profits and losses are eliminated to the extent of the Company's interest in the relevant associate.

***Equity investments in other entities***

Equity investments in other entities represent the Company's investments in ordinary shares of the entities over which the Company has no control, joint control, or significant influence.

Equity investments in other entities are carried at cost less provision for impairment.

**Financial investments**

***Held-to-maturity investments***

Held-to-maturity investments comprise investments that the Company has the positive intent or ability to hold to maturity, including term deposits to earn periodic interest.

Post-acquisition interest income from held-to-maturity investments is recognised in the interim income statement on an accrual basis.

**Cash and cash equivalents**

Cash and cash equivalents comprise cash on hand, demand deposits and short-term, highly liquid investments (not exceeding 3 months) that are readily convertible to known amounts of cash and which are subject to an insignificant risk of changes in value.

**Receivables**

Receivables represent the amounts recoverable from customers or other debtors and are stated at book value less provision for doubtful debts.

Provision for doubtful debts is made for receivables that are overdue, or when the debtor is in dissolution, in bankruptcy, or is experiencing similar difficulties and so may be unable to repay the debt.

**Inventories**

Inventories are stated at the lower of cost and net realizable value. Cost comprises direct materials and where applicable, direct labour costs and those overheads that have been incurred in bringing the inventories to their present location and condition. Costs of merchandises include cost of purchases and other directly attributable expenses. Issue price is calculated using the weighted average method. Net realizable value represents the estimated selling price less all estimated costs to completion and costs to be incurred in marketing, selling and distribution.

The evaluation of necessary provision for inventory obsolescence follows current prevailing accounting regulations which allow provisions to be made for obsolete, damaged, or sub-standard inventories and for those which have costs higher than net realizable values as at the consolidated balance sheet date.

The Company and its subsidiaries apply the perpetual method to account for inventories.

**Tangible fixed assets and depreciation**

Tangible fixed assets are stated at cost less accumulated depreciation.

The costs of purchased tangible fixed assets comprise their purchase prices and any directly attributable costs of bringing the assets to their working conditions and locations for their intended use.

Tangible fixed assets are depreciated using the straight-line method over their following estimated useful lives:

	<u>Years</u>
Buildings and structures	03 – 35
Machinery and equipment	06 - 20
Motor vehicles, transmission equipment	06 - 20
Management tools and equipment	03 - 10

### **Leasing**

All of the Company's leases are operating leases.

#### The Company as lessor

Revenue of operating lease is recognized on a straight-line basic over the lease term. Initial direct costs incurred in negotiating and arranging an financial lease are charged to the income statement when incurred or charged to the income statement using straight-line method over the lease term.

#### The Company as lessee

Leases where substantially all the rewards and risks of ownership of assets remain with the leasing company are accounted for as operating leases. Rentals payable under operating leases are charged to the income statement on a straight-line basis over the term of the relevant lease. Benefits received and receivable as an incentive to enter into an operating lease are also spread on a straight-line basis over the lease term.

### **Intangible assets and amortization**

#### ***Land use rights***

Intangible assets represent land use rights that are stated at cost less accumulated amortisation. Land use rights are amortised using the straight-line method over the period of 50 years.

#### ***Computer software***

Cost of acquisition of new computer software, which is not an integral part of the related hardware, is capitalized and treated as an intangible asset. Computer software is amortized using the straight-line method over the period of 04 years.

### **Construction in progress**

Properties in the course of construction for production, rental or administrative purposes, or for other purposes, are carried at cost includes costs that are necessary to form the assets in accordance with the Company's accounting policy. Depreciation of these assets, on the same basis as other assets, commences when the assets are ready for their intended use.

### **Prepayments**

Prepayments are expenses which have already been paid but relate to results of operations of multiple accounting periods, including initial cost of clay mines, insurance fees and other types of prepayments.

The initial cost of the clay mines are allocated to the cost of mining land according to the ratio of the production output in the year and the estimated reserves of each mine.

Insurance fees including fire insurance, physical insurance and risk insurance for properties have been paid for many years. Insurance fees are amortized to the consolidated income statement on a straight-line basis over the effective period.

Other types of repayments comprise costs of tools and supplies issued for consumption, which are allocated to the consolidated income statement using the straight-line method in accordance with the prevailing accounting regulations.

### **Payable provisions**

Payable provisions are recognised when the Company has a present obligation as a result of a past event, and it is probable that the Company will be required to settle that obligation. Provisions are measured at the Board of Executive Officers's best estimate of the expenditure required to settle the obligation as at the consolidated balance sheet date.

### **Unearned Revenue**

Unearned revenue is the amounts received in advance relating to one or more accounting periods for rental services of collective housing for employees that have been yet provided or delivered. The Company recognizes unearned revenue in proportion to its obligations that the Company will have to perform in the future. When the revenue recognition conditions are satisfied, unearned revenue will be recognized in the consolidated income statement for the year corresponding to the portion that meets the revenue recognition conditions.

### **Revenue recognition**

#### ***Revenue from the sales of goods***

Revenue from the sale of goods is recognised when all five (5) following conditions are satisfied:

- (a) The Company has transferred to the buyer the significant risks and rewards of ownership of the goods;
- (b) The Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the goods sold;
- (c) The amount of revenue can be measured reliably;
- (d) It is probable that the economic benefits associated with the transaction will flow to the Company; and
- (e) The costs incurred or to be incurred in respect of the transaction can be measured reliably.

#### ***Interest income and investment income***

Interest income is accrued on a time basis, by reference to the principal outstanding and at the applicable interest rate.

Dividend income from investments recognised when the Company's right to receive payment has been established.

### Basic earnings per share

The Company presents basic earnings per share (EPS) for its ordinary shares. Basic earnings per share is calculated by dividing the profit or loss attributable to ordinary shareholders of the Company by the weighted average number of outstanding common shares during the year.

### Foreign currencies

Transactions arising in foreign currencies are translated at exchange rates ruling at the transaction date. The balances of monetary items denominated in foreign currencies as at the consolidated balance sheet date are retranslated at the exchange rates of commercial bank where the Company usually transacts on the same date. Exchange differences arising from the translation of these accounts are recognised in the consolidated income statement.

### Borrowing costs

Borrowing costs are recognised in the income statement in the year when incurred unless they are capitalised in accordance with Vietnamese Accounting Standard No. 16 "Borrowing costs". Accordingly, borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period of time to get ready for their intended use or sale, are added to the cost of those assets, until such time as the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the cost of those assets. For specific borrowings for the purpose of construction of fixed assets and investment properties, borrowing costs are capitalised even when the construction period is under 12 months.

### Taxation

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the year. Taxable profit differs from profit before tax as reported in the consolidated income statement because it excludes items of income or expense that are taxable or deductible in other years and it further excludes items that are never taxable or deductible.

Deferred tax is recognised on significant differences between carrying amounts of assets and liabilities in the consolidated financial statements and the corresponding tax bases used in the computation of taxable profit and is accounted for using balance sheet liability method. Deferred tax liabilities are generally recognised for all temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilised.

Deferred tax is calculated at the tax rates that are expected to apply in the year when the liability is settled or the asset realised. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same tax authority and the Company intends to settle its current tax assets and liabilities on a net basis.

The determination of the tax currently payable is based on the current interpretation of tax regulations. However, these regulations are subject to periodic variation and their ultimate determination depends on the results of the tax authorities' examinations.

As at 30 June 2025, the Company has a tax loss that can be used to offset against future taxable profits within 5 years from the year the loss arises, but no deferred tax asset has been recognized because the Company is uncertain about its future profitability.

Other taxes are paid in accordance with the prevailing tax laws in Vietnam.

### **Revenue recognition**

#### ***Revenue from real estate***

Revenue from the sale of real estate which the Company is the investor is recognised when all five (5) following conditions are satisfied:

- (a) the real estate has been completed and transferred to the buyer, the Company has transferred to the buyer the significant risks and rewards of ownership of the real estate;
- (b) the Company retains neither continuing managerial involvement to the degree usually associated with ownership nor effective control over the real estate sold;
- (c) the amount of revenue can be measured reliably;
- (d) the economic benefits associated with the transaction flowed or will flow to the Company; and
- (e) the costs incurred or to be incurred in respect of the transaction can be measured reliably.

For real estate in which the Company is an investor; the client has the right to complete the interior of the real estate and the Company performs the interior completion of the property in accordance with the customer's designs and requirements. The Company recognizes as revenue upon completion, handing over the raw construction to the customers when all five (5) of the same conditions are met.

#### ***Interest income and gain from investments***

Interest income is accrued on a time basis, by reference to the principal outstanding and at the applicable interest rate.

Income from investments is recognized when the Company has the right to receive the interest.

### **Borrowing costs**

Borrowing costs are recognized in the interim consolidated income statement in the period when incurred unless they are capitalized in accordance with Vietnamese Accounting Standard No. 16 "Borrowing costs". Accordingly, borrowing costs directly attributable to the acquisition, construction or production of qualifying assets, which are assets that necessarily take a substantial period to get ready for their intended use or sale, are added to the cost of those assets, until the assets are substantially ready for their intended use or sale. Investment income earned on the temporary investment of specific borrowings pending their expenditure on qualifying assets is deducted from the cost of those assets. For specific borrowings for construction of fixed assets and investment properties, borrowing costs are capitalized even when the construction period is under 12 months.

### **Taxation**

Income tax expense represents the sum of the tax currently payable and deferred tax.

The tax currently payable is based on taxable profit for the period. Taxable profit differs from profit before tax as reported in the interim consolidated income statement because it excludes items of income or expense that are taxable or deductible in other periods (including loss carried forward, if any) and it further excludes items that are never taxable or deductible.

Deferred tax is recognized on significant differences between carrying amounts of assets and liabilities in the interim consolidation financial statements and the corresponding tax bases used in the computation of taxable profit and is accounted for using the balance sheet liability method. Deferred tax liabilities are generally recognised for all temporary differences and deferred tax assets are recognised to the extent that it is probable that taxable profit will be available against which deductible temporary differences can be utilised.

As at 30 June 2025, Hung Thinh Phat Housing Investment Company Limited - a subsidiary of the Company has losses that can be carried forward to offset against future taxable income within 5 years. The Company has not recognized deferred income tax assets for this tax loss due to uncertainty about future profits.

Deferred tax is calculated at the tax rates that are expected to apply in the period when the liability is settled or the asset is realised. Deferred tax is charged or credited to profit or loss, except when it relates to items charged or credited directly to equity, in which case the deferred tax is also dealt with in equity.

Deferred tax assets and liabilities are offset when there is a legally enforceable right to set off current tax assets against current tax liabilities and when they relate to income taxes levied by the same tax authority and the Company intends to settle its current tax assets and liabilities on a net basis.

The determination of the tax currently payable is based on the current interpretation of tax regulations. However, these regulations are subject to periodic variation and their ultimate determination depends on the results of the tax authorities's examinations.

Other taxes are paid in accordance with the prevailing tax laws in Vietnam.

- (i) Represents costs of “the Project of Resettlement and housing for employees of Tuynel brick factory in Le Loi commune, Ha Long City” carried out for the purpose of building collective houses and residential areas for employees of the Company. The project has been implemented since 2009 but delayed after that due to many objective reasons about market demand, therefore, the Department of Planning and Investment of Quang Ninh Province issued Decision No. 3791/QD-KHDT dated 25 December 2017 on termination of investment in this project. On 10 January 2018, the People's Committee of Quang Ninh Province issued Decision No. 44/QD-UBND to recover the land previously assigned to the Company to implement the project and assigned the People's Committee of Ha Long City - currently known as the People's Committee of Hoanh Bo Ward to propose a plan to deal with the land use costs and ground clearance expenses paid by the Company in accordance with the law. At present, the Company continues to coordinate with Ha Long City Land Fund Development Center to hand over land to the locality, determine the value and carry out procedures for reimbursement of expenses the Company invested in the project. As at 30 June 2025, the Company made a provision corresponding to the cost of ground leveling, project consulting and compensation amounting to VND 16.75 billion, following the principle of prudence (31 December 2024: VND 16.75 billion).
