FINANCIAL STATEMENTS

Quarter 2/2025

NOTES TO THE FINANCIAL STATEMENTS

Quarter 2/2025

I. OPERATIONAL CHARACTERISTICS**1. Form of capital ownership**

Hai Minh Corporation (hereinafter referred to as the “Company”) is a joint-stock company.

2. Business sector

The Company operates in the service sector.

3. Business activities

The main business activities of the Company are: Cargo transportation services by river and road; warehouse and office leasing; maritime agency services.

4. Normal business cycle

The Company’s normal business cycle does not exceed 12 months.

5. Operational characteristics affecting the financial statements during the year

The company's profit this quarter dropped significantly compared to the previous quarter, primarily due to challenges in the transportation services sector this year, with higher input costs and a decline in production output.

6. Company structure***Subsiriaries***

Company Name	Registered Address	Principal Business Activities	Ownership Ratio	Benefit Ratio	Voting Rights Ratio
Nam Phat Logistics Company Limited	Floor 3, Hai Minh Building, Km105 Nguyen Binh Khiem Bypass Road, Dong Hai 2 Ward, Hai An District, Hai Phong City	Warehousing and Freight Transportation Services	96,79%	96,79%	96,79%
Hai Minh Logistics Company Limited	Floor 3, Hai Minh Building, Km105 Nguyen Binh Khiem Bypass Road, Dong Hai 2 Ward, Hai An District, Hai Phong City	Warehousing and Freight Transportation Services	99,92%	99,92%	100,00%
Hai Minh Marine Services Company Limited	Floor 3, Hai Minh Building, Km105 Nguyen Binh Khiem Bypass Road, Dong Hai 2 Ward, Hai An District, Hai Phong City	Warehousing and Freight Transportation Services	99,00%	99,00%	100,00%

7. Statement on the comparability of information in the financial statements

The corresponding figures from the previous period are comparable with those of the current period.

8. Employees

At the end of the quarter, the company has 21 employees currently working (the number at the beginning of the year was 17 employees).

II. ACCOUNTING PERIOD AND CURRENCY USED IN ACCOUNTING

This notes to the financial statements is an integral part and must be read in conjunction with the Financial Statements

HAI MINH CORPORATION

Address: 17th Floor, Pearl Plaza Building, 561A Dien Bien Phu Street, Ward 25, Binh Thanh District, Ho Chi Minh City
FINANCIAL STATEMENTS

Quarter 2/2025

Notes to the Financial Statements (Continued)

1. Fiscal Year

The Company's fiscal year begins on January 1 and ends on December 31 each year.

2. Currency Used in Accounting

The currency used in accounting is the Vietnamese Dong (VND) as the majority of transactions are conducted in this currency.

III. ACCOUNTING STANDARDS AND SYSTEM APPLIED

1. Accounting system applied

The Company applies the Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting System issued under Circular No. 200/2014/TT-BTC dated December 22, 2014, and other circulars guiding the implementation of the accounting standards by the Ministry of Finance in preparing and presenting the financial statements.

2. Declaration of compliance with accounting standards and system

The Board of Management ensures compliance with the requirements of the Vietnamese Accounting Standards, the Vietnamese Enterprise Accounting System issued under Circular No. 200/2014/TT-BTC dated December 22, 2014, as well as other circulars guiding the implementation of accounting standards by the Ministry of Finance in preparing and presenting the financial statements.

IV. ACCOUNTING POLICIES APPLIED

1. Basis for preparation of financial statements

The financial statements are prepared on an accrual basis (except for cash flow-related information).

2. Cash and cash equivalents

Cash includes cash on hand and demand deposits in banks. Cash equivalents are short-term investments with a maturity not exceeding three months from the investment date, which are easily convertible into a known amount of cash and are subject to an insignificant risk of changes in value at the reporting date.

3. Financial Investments

Trading Securities

Investments are classified as trading securities when held for the purpose of buying and selling for profit.

Trading securities are recorded in the accounting books at cost. The cost of trading securities is determined based on the fair value of the payments at the transaction date, plus any transaction-related costs incurred during the purchase of the trading securities.

The recognition time for trading securities is the moment the Company acquires ownership, specifically as follows:

- For listed securities: recognized at the matching date (T+0)
- For unlisted securities: recognized at the official ownership transfer date in accordance with legal regulations.

Interest, dividends, and profits accrued prior to the purchase of trading securities are deducted from the cost of the securities. Interest, dividends, and profits accrued after the purchase are recorded as revenue. Dividends received in shares are tracked as an increase in the number of shares, without recognizing the value of the received shares.

HAI MINH CORPORATION

Address: 17th Floor, Pearl Plaza Building, 561A Dien Bien Phu Street, Ward 25, Binh Thanh District, Ho Chi Minh City
FINANCIAL STATEMENTS

Quarter 2/2025

Notes to the Financial Statements (Continued)

A provision for the decline in value is made for each type of trading security traded on the market if its fair value is lower than its cost. The fair value of trading securities is determined as follows:

- For securities listed on stock exchanges: the closing price on the nearest trading date to the reporting period end.
- For shares registered for trading on the unlisted public company market (UPCOM): the reference price is the average price of the last 30 consecutive trading days before the end of the fiscal year, as published by the Stock Exchange.
- In cases where stocks listed on the stock market or stocks of joint stock companies registered for trading on the Upcom market have no transactions in the 30 days prior to the provision for losses, or when listed stocks are delisted, suspended, or halted from trading: the provision is made based on the losses of the invested company, with the provision amount calculated as the difference between the actual investment of the owners and the equity at the end of the fiscal year, multiplied by the ownership ratio of the company's charter capital compared to the total paid-in charter capital.
- For corporate bonds: the bond price for listed or registered corporate bonds is the most recent trading price on the Stock Exchange within 10 days prior to the end of the fiscal year. If there are no transactions within 10 days leading up to the end of the fiscal year, no provisions will be made for this investment.

The increase or decrease in the provision for the impairment of trading securities to be recognized at the end of the fiscal year is recorded as a financial expense.

Gains or losses from the disposal of trading securities are recognized in financial income or financial expenses. The cost is determined using the moving weighted average method.

Investments held to maturity

An investment is classified as held to maturity when the Company has the intention and ability to hold the investment until maturity. Investments held to maturity consist only of fixed-term bank deposits and bonds held to maturity with the objective of earning periodic interest income.

Investments held to maturity are initially recognized at cost. After initial recognition, these investments are recorded at their recoverable amount. Interest income from investments held to maturity after the purchase date is recognized in the income statement on an accrual basis. Interest received before the company holds the investment is deducted from the cost at the time of purchase.

When there is reliable evidence indicating that part or all of an investment may be impaired and the loss can be reliably determined, the loss is recognized as a financial expense for the year and directly deducted from the investment value.

Loans

Loans are recognized at cost, less any provision for doubtful debts. The provision for doubtful debts on loans is made based on the estimated potential losses.

Investments in subsidiaries and associates

Subsidiaries

A subsidiary is a company that is controlled by the parent company. Control is achieved when the parent company has the ability to control the financial and operating policies of the investee company in order to derive economic benefits from its activities.

HAI MINH CORPORATION

Address: 17th Floor, Pearl Plaza Building, 561A Dien Bien Phu Street, Ward 25, Binh Thanh District, Ho Chi Minh City

FINANCIAL STATEMENTS

Quarter 2/2025

Notes to the Financial Statements (Continued)

Associates

An associate is an entity over which the Company has significant influence but does not have control over the financial and operational policies. Significant influence is demonstrated by the right to participate in making decisions about the financial and operational policies of the investee, but without controlling those policies.

Initial Recognition

Investments in subsidiaries and associates are initially recognized at cost, which includes the purchase price or capital contribution plus any directly related investment costs. In the case of investment through non-monetary assets, the cost of the investment is recognized at the fair value of the non-monetary assets at the time of the transaction.

Dividends and profits from periods prior to the purchase of the investment are accounted for as a reduction in the value of the investment itself. Dividends and profits from periods after the investment purchase are recognized as revenue. Stock dividends received are only tracked in terms of the additional number of shares, without recognizing the value of the received shares.

Provision for impairment of investments in subsidiaries and associates

Provision for impairment of investments in subsidiaries and associates is made when the subsidiary or associate incurs losses. The provision is calculated as the difference between the actual investment by the parties in the subsidiary or associate and the actual equity, multiplied by the ownership percentage of the parent company in the subsidiary or associate. If the subsidiary or associate is subject to consolidated financial statements, the basis for determining the impairment provision is the consolidated financial statements.

The increase or decrease in the provision for impairment of investments in subsidiaries and associates to be recognized at the end of the fiscal year is recorded as a financial expense.

4. Accounts Receivable

Receivables are presented at their book value, less any provision for doubtful debts.

The classification of receivables into trade receivables and other receivables is based on the following principles:

- Trade receivables reflect amounts owed arising from commercial transactions related to the buying and selling activities between the company and independent customers.
- Other receivables reflect amounts owed that are not related to commercial transactions and do not involve buying and selling activities.

Provision for doubtful debts is made for each receivable based on the estimated potential losses that may occur.

The increase or decrease in the provision for doubtful debts to be recognized at the end of the fiscal year is recorded as an administrative expense.

HAI MINH CORPORATION

Address: 17th Floor, Pearl Plaza Building, 561A Dien Bien Phu Street, Ward 25, Binh Thanh District, Ho Chi Minh City

FINANCIAL STATEMENTS

Quarter 2/2025

Notes to the Financial Statements (Continued)

5. Inventories

Inventory is recognized at the lower of cost or net realizable value.

The cost of inventory, including raw materials, consists of the purchase cost and other directly related costs incurred to bring the inventory to its current location and condition.

The cost of goods sold is calculated using the weighted average method and is recorded using the perpetual inventory system.

Net realizable value is the estimated selling price of the inventory in the ordinary course of production and business, less the estimated costs to complete and the estimated costs necessary to sell the inventory.

A provision for inventory write-down is made for each inventory item where the cost exceeds its net realizable value. The increase or decrease in the provision for inventory write-down to be recognized at the end of the fiscal year is recorded in the cost of goods sold.

6. Prepaid Expenses

Prepaid expenses include costs that have been incurred but are related to the results of business operations over multiple accounting periods. The Company's prepaid expenses mainly consist of asset repair costs and tools and equipment expenses. These prepaid expenses are allocated over the period of the prepayment or the period in which the corresponding economic benefits are derived from these expenses.

Asset repair expenses

One-time asset repair costs with significant value are amortized over a period of 36 months using the straight-line method.

Tools and equipment expenses

Tools and equipment that have been put into use are amortized over a period of no more than 36 months using the straight-line method.

7. Operating lease assets

Leased assets are classified as operating leases if most of the risks and benefits associated with ownership of the asset are retained by the lessor. Operating lease expenses are recognized in expenses using the straight-line method over the lease term, regardless of the payment method.

8. Tangible fixed assets

Tangible fixed assets are presented at their cost less accumulated depreciation. The cost of tangible fixed assets includes all costs incurred by the company to acquire the asset and make it ready for use. Costs incurred after initial recognition are only added to the cost of the asset if they are certain to increase future economic benefits from the use of the asset. Costs that do not meet this condition are recognized as production and business expenses in the current year.

When a tangible fixed asset is sold or disposed of, its cost and accumulated depreciation are written off, and any gain or loss from the disposal is recognized as income or expense in the current year.

Tangible fixed assets are depreciated using the straight-line method based on the estimated useful life. The number of years for depreciation of various types of tangible fixed assets is as follows:

<u>Fixed Assets</u>	<u>Years</u>
Buildings and structures	43
Machinery and equipment	5

HAI MINH CORPORATION

Address: 17th Floor, Pearl Plaza Building, 561A Dien Bien Phu Street, Ward 25, Binh Thanh District, Ho Chi Minh City

FINANCIAL STATEMENTS

Quarter 2/2025

Notes to the Financial Statements (Continued)

<u>Fixed Assets</u>	<u>Years</u>
Transportation and transmission vehicles	6 - 15
Management tools and instruments	5
Other fixed assets	10

9. Intangible fixed assets

Intangible assets are presented at their cost less accumulated amortization.

Intangible fixed assets only include land use rights. Land use rights encompass all actual expenses that the company has incurred directly related to the land used, including costs to obtain land use rights, registration fees, etc. Land use rights are depreciated using the straight-line method over 43 years.

When intangible fixed assets are sold or liquidated, the original cost and accumulated depreciation are written off, and any profit or loss from the liquidation is recognized as income or expense in the year.

10. Investment Properties

company incurs or the fair value of other contributions exchanged to acquire the investment property as of the purchase date.

Expenses related to investment property incurred after initial recognition must be recognized as production and business expenses in the year, unless these expenses are likely to ensure that the investment property generates future economic benefits exceeding the initially assessed level, in which case they may be added to the original cost of the investment property.

The company depreciates investment properties using the straight-line method based on the estimated useful life. Specifically, the depreciation period for investment properties is 50 years.

11. Construction in Progress

Construction in progress reflects the directly related costs (including relevant borrowing costs in accordance with the company's accounting policy) associated with assets under construction, machinery and equipment being installed for production, leasing, and management purposes, as well as costs related to the repair of fixed assets being carried out. These assets are recorded at their original cost and are not subject to depreciation.

12. Payables and accrued expenses

Accounts payable and accrued expenses are recognized for amounts owed in the future related to goods and services received. Accrued expenses are recognized based on reasonable estimates of the amounts to be paid.

The classification of payables as trade payables, accrued expenses, and other payables is carried out according to the following principles:

- Trade payables reflect amounts owed arising from transactions for the purchase of goods, services, and assets, where the seller is an independent entity from the Company.
- Accrued expenses reflect amounts payable for goods or services received from suppliers or provided to the buyer, but not yet paid due to the absence of invoices or insufficient accounting documents, as well as amounts payable to employees for wages, vacation pay, and accrued business expenses.
- Other payables reflect amounts owed that are non-commercial and not related to the purchase or provision of goods and services.

Payables and accrued expenses are classified as short-term and long-term on the balance sheet based on the remaining term at the end of the financial year.

HAI MINH CORPORATION

Address: 17th Floor, Pearl Plaza Building, 561A Dien Bien Phu Street, Ward 25, Binh Thanh District, Ho Chi Minh City

FINANCIAL STATEMENTS

Quarter 2/2025

Notes to the Financial Statements (Continued)

13. Owner's Equity

Owner's Equity

Owner's equity contributions are recorded at the actual capital contributed by shareholders.

Share Premium

Share premium is recognized as the difference between the issue price and the par value of shares when they are initially issued or when additional shares are issued. It also includes the difference between the reissue price and the book value of treasury shares, as well as the capital component of convertible bonds upon maturity. Direct costs associated with the issuance of additional shares and the reissue of treasury shares are deducted from the share premium.

Treasury Shares

When repurchasing shares issued by the Company, the payment amount, including transaction-related costs, is recognized as treasury shares and reflected as a deduction in equity. Upon reissuance, the difference between the reissue price and the book value of the treasury shares is recorded in the 'Share Premium' account.

14. Profit Distribution

Net income after corporate income tax is distributed to shareholders after allocating the required reserves according to the company's charter and relevant legal regulations, and with the approval of the General Meeting of Shareholders.

The distribution of profits to shareholders takes into account non-monetary items within the undistributed after-tax profits that may affect cash flow and the ability to pay dividends, such as gains from the revaluation of contributed capital assets, gains from the revaluation of monetary items, financial instruments, and other non-monetary items.

Dividends are recognized as liabilities when approved by the General Meeting of Shareholders.

15. Revenue and income recognition

Revenue from services provision

Revenue from services provision is recognized when the following conditions are met simultaneously:

- Revenue is recognized when it is relatively certain. If the contract stipulates that the buyer has the right to return the purchased service under specific conditions, revenue is only recognized when those specific conditions no longer exist and the buyer no longer has the right to return the provided service.
- The Company has received or will receive economic benefits from the service transaction.
- The portion of work completed at the reporting date can be determined.
- The costs incurred for the transaction and the costs to complete the service transaction can be identified.

In cases where services are performed over multiple periods, revenue is recognized in the period based on the results of the portion of work completed as of the end of the financial year.

Revenue from leasing assets

Revenue from leasing assets is recognized using the straight-line method over the lease term. Rent received in advance for multiple periods is allocated to revenue in accordance with the lease period.

Interest Income

Interest income is recognized based on the time period and the effective interest rate for each period.

HAI MINH CORPORATION

Address: 17th Floor, Pearl Plaza Building, 561A Dien Bien Phu Street, Ward 25, Binh Thanh District, Ho Chi Minh City
FINANCIAL STATEMENTS

Quarter 2/2025

Notes to the Financial Statements (Continued)

Dividends and Profit Sharing

Dividends and profit distributions are recognized when the Company is entitled to receive dividends or profits from its investments. Dividends received in the form of shares are only tracked by the increase in the number of shares, without recognizing the value of the shares received.

16. Borrowing Costs

Borrowing costs include interest on loans and other costs directly related to the borrowing.

Borrowing costs are recognized as an expense when incurred. However, if borrowing costs are directly related to the construction or production of assets under development that require a period of time (more than 12 months) to become available for use or sale, those borrowing costs are capitalized as part of the asset's cost. For borrowings related to the construction of fixed assets or investment properties, interest is capitalized even if the construction period is less than 12 months. Income arising from temporarily investing borrowed funds is deducted from the asset's cost.

For general borrowings used for investment in construction or production of unfinished assets, the capitalized borrowing costs are determined based on the capitalization rate applied to the weighted average accumulated costs incurred for basic construction or production of those assets. The capitalization rate is calculated based on the weighted average interest rate of outstanding borrowings during the year, excluding specific borrowings aimed at creating a particular asset.

17. Expenses

Expenses are amounts that reduce economic benefits recognized at the time the transaction occurs or when there is a reasonably certain expectation of future expenses, regardless of whether cash has been paid or not.

The expenses and the related revenues generated must be recognized simultaneously according to the matching principle. In cases where the matching principle conflicts with the prudence principle, expenses are recognized based on the nature and requirements of accounting standards to ensure that transactions are presented fairly and accurately.

18. Corporate Income Tax

Corporate income tax expense includes current income tax and deferred income tax.

Current Income Tax

Current income tax is the amount of tax computed based on taxable income. The taxable income differs from accounting profit due to temporary differences between tax and accounting, non-deductible expenses, as well as adjustments for non-taxable income and carryforward losses.

Deferred Income Tax

Deferred income tax is the corporate income tax that will be payable or refunded due to temporary differences between the carrying amount of assets and liabilities for financial reporting purposes and the tax base. Deferred income tax liabilities are recognized for all taxable temporary differences. Deferred tax assets are only recognized when it is probable that future taxable profits will be available to utilize these deductible temporary differences.

The carrying amount of deferred tax assets is reviewed at the end of the financial year and will be reduced to ensure that there is sufficient taxable profit to allow for the benefit of some or all of the deferred tax assets to be utilized. Deferred tax assets that have not been previously recognized are reviewed at the end of the financial year and are recognized when it is certain that there is sufficient taxable profit to utilize these unrecognized deferred tax assets.

HAI MINH CORPORATION

Address: 17th Floor, Pearl Plaza Building, 561A Dien Bien Phu Street, Ward 25, Binh Thanh District, Ho Chi Minh City

FINANCIAL STATEMENTS

Quarter 2/2025

Notes to the Financial Statements (Continued)

Deferred tax assets and deferred tax liabilities are determined based on the tax rates expected to apply in the year the asset is recovered or the liability is settled, using the tax rates effective at the end of the financial year. Deferred tax is recognized in the income statement and is only recorded directly in equity when the tax relates to items recognized directly in equity.

Deferred tax assets and liabilities are offset when:

- The Company has a legally enforceable right to offset current tax assets against current tax liabilities;
- The deferred tax assets and liabilities relate to income taxes levied by the same taxation authority:
 - For the same taxable entity;
 - The company intends to settle the current income tax payable and the current deferred tax assets on a net basis or recover the assets simultaneously with the settlement of liabilities in each future period when significant amounts of deferred tax liabilities or deferred tax assets are settled or recovered.

19. Related Parties

Parties are considered related if one party has the ability to control or exert significant influence over the other party in making decisions about financial policies and operations. Parties are also considered related if they share joint control or significant common influence.

In considering the relationship between related parties, more emphasis is placed on the substance of the relationship rather than its legal form.

20. Segment Reporting

A business segment is a distinguishable component that engages in producing or providing products, services, and has economic risks and benefits different from other business segments.

A geographical segment is a distinguishable component that engages in producing or providing products, services within a specific economic environment, and has economic risks and benefits different from other business segments operating in other economic environments.

Segment information is prepared and presented in accordance with the accounting policies applied for the preparation and presentation of the Company's financial statements.

Value Added Tax (VAT)

The company applies the credit method for VAT. The VAT rate for commission fees to shipping agents is 0%, while the VAT rate for other services is 8%-10%.

Corporate Income Tax

The company must pay corporate income tax on taxable income at a tax rate of 20%.

The determination of corporate income tax payable by the company is based on the current tax regulations. However, these regulations change over time, and tax rules for various types of transactions can be interpreted in different ways. Therefore, the tax amount presented in the financial statements may change when the tax authorities conduct an audit.

Other Taxes

The Company declares and pays in accordance with regulations.
